

# Improving Diagnosis of Skin Conditions

WITH VISUALDX USING APPLE CORE ML

**6%**

Over 6% of skin conditions are seen by non-dermatologists.

**21 HOURS**

Generalists receive an average of 21 HOURS of training in dermatology, making it difficult to accurately diagnose skin conditions and their corresponding illnesses.

**15%**

15% of all doctor visits include a skin related complaint.

**48%**

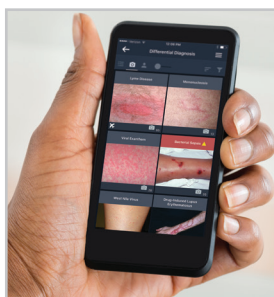

48% of non-dermatologists misdiagnose skin conditions.

## CORE ML PROTECTS PRIVACY.

Photo is only stored in physician's phone memory. VisualDx never receives it.

## DISTRIBUTED CORE PROCESSING

saves money, improves speed and accuracy of diagnosis.

## VISUALDx PHYSICIANS

- 50% use VisualDx on a mobile device
- 80% use Apple iPhone or iPad
- 20% use Android

*“Nearly every person will experience a diagnostic error in their lifetime.”*
