

Start learning today

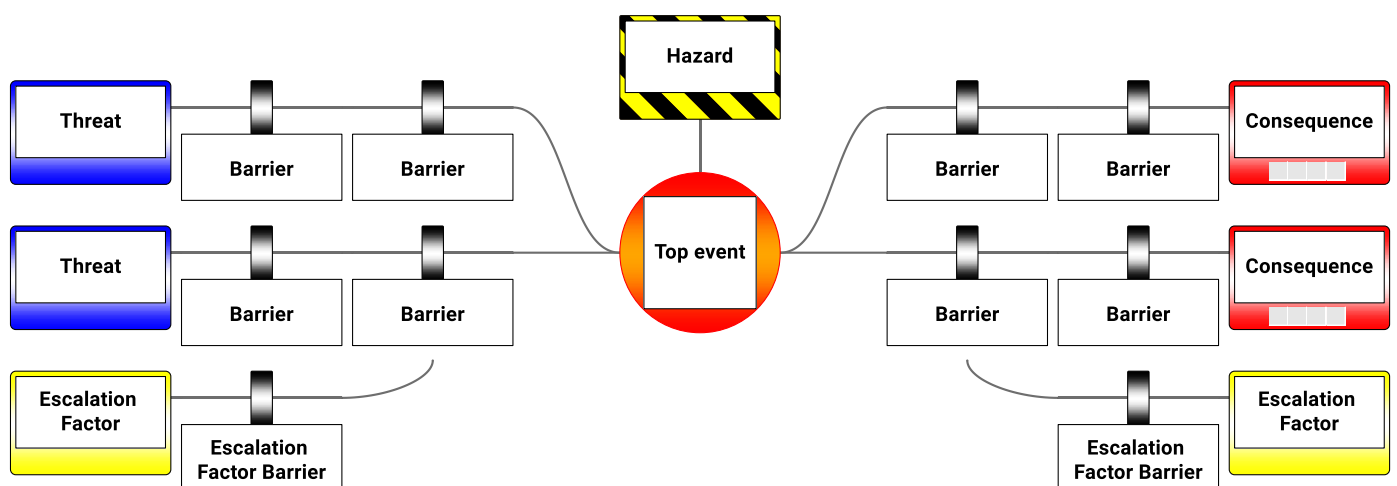

Build BowTieXP competence through an easily accessible online solution, useful for all stakeholders who need to interpret bowtie diagrams. Start learning whenever it fits your schedule, remotely in the comfort of your own environment (e.g. at home or at work). e-Learning is ideal to get familiar with the bowtie method or to refresh your knowledge.

Improve your knowledge & skills

With the two existing modules you can choose the course that is suitable for you. Do you want to learn more about the bowtie method? Start with the first module 'Basic Bowtie Methodology'. Are you already familiar with the bowtie method and eager to learn how you can apply the software tool? Follow the second module 'Bowtie Diagram Construction with BowTieXP'.

Develop bowtie diagrams

After completing the e-Learning modules, you will have a basic understanding of the bowtie method and learned how to apply this method using the BowTieXP software tool. You are ready to start building your own basic bowtie diagrams.

Use e-Learning to:

Understand the basics

Do you want to become familiar with the bowtie method and learn how to build diagrams with help of BowTieXP? Start e-Learning to master the basics. From definitions of the bowtie elements to running your first reports in BowTieXP, e-Learning will teach you the fundamentals.

Meet your training requirements

Whether you only need to be able to read bowties and understand the method, or if you would like to learn how to build diagrams in BowTieXP, simply choose the right module to start learning:

- Basic Bowtie Methodology
- Bowtie Diagram Construction with BowTieXP

Save time

As you can run the e-Learning modules from home or at work, you do not have to travel for training and can quickly start building bowties. One module can be completed in approximately two hours straight or over a period of time, whatever fits your schedule. No previous experience with the software is required, you can start immediately.

Complete a full learning experience

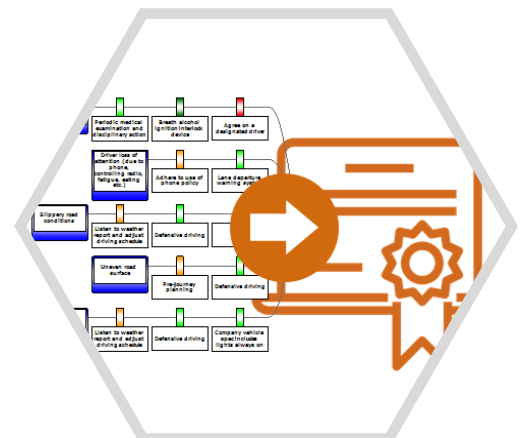

Every module has a step-by-step approach with several chapters to complete. You will be guided through these steps with elaborate explanations, supported by visualizations and exercises. A personal certificate will be awarded upon completion of the module.

Prepare for the next step

The e-Learning modules are a great first step into creating bowtie diagrams yourself, as e-Learning is designed for basic understanding of both the method and software. Are you looking for a more in-depth training or would like to interact with other training participants? A training course by CGE or a value added partner is highly recommended. Check out the training & event section on www.cgerisk.com.
