# SmartSign™ Plus

Financial services eSignature delivered at enterprise speed and scale

Digital transformation starts with eSignature.  
Wolters Kluwer SmartSign™ Plus is purpose-built for  
extensible, intuitive, and compliant document eSignature  
across the lending lifecycle in every asset class.

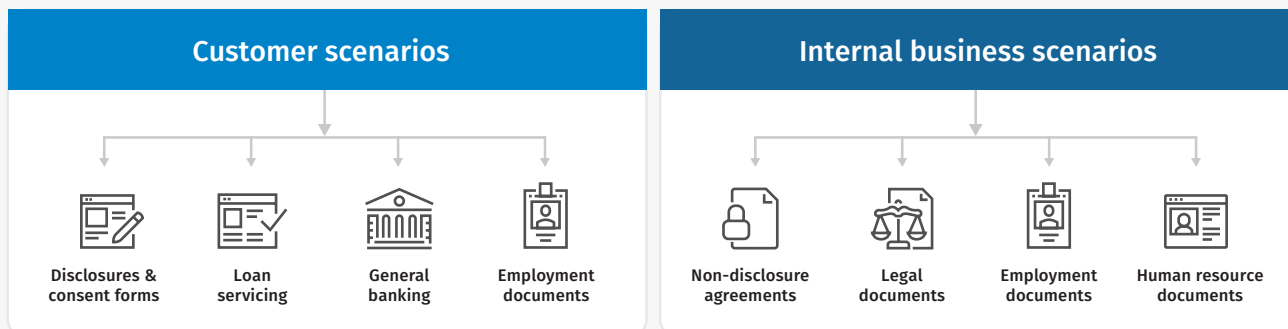

Today, consumers overwhelmingly seek frictionless and secure digital financial services and prefer remote and contactless lending experiences. With purpose-built eSignature, lenders can provide compliant and auditable digital-first product solutions that deliver unparalleled borrower convenience.

## Deploy scalable enterprise technology

SmartSign™ Plus offers intelligent user management for large organizations, enabling precise permissioning and access that aligns with the team and role structures of your organization. SmartSign Plus supports a wide range of use-cases, from disclosures to promissory notes, for financial services companies with multiple lines of business. SmartSign's wide applicability enables an elegant, consistent experience through the entire customer journey. SmartSign Plus is delivered with dedicated customer success services. Wolters Kluwer customer success services provides a high touch concierge experience – from contract execution to solution go-live, and beyond.

## SmartSign™ Plus seamlessly supports a range of customer-facing and internal business scenarios

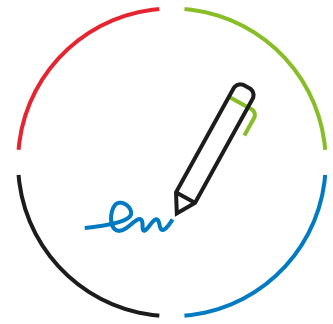

### Deliver next-generation signing experiences

SmartSign™ Plus includes a full-featured signing room login and workspace. SmartSign Plus' intuitive and context-rich signing workflow provides an optimized frame of reference, reducing signing experience issues and errors. SmartSign Plus offers a full range of signing experiences – from in-person digital, remote digital, and email - to enable every customer engagement scenario across the enterprise. The SmartSign Plus signing room is truly omni-channel, supporting signing experiences across all digital device types including personal computers, tablets, and mobile devices.

### Simplify eSignature extension & automation

SmartSign™ Plus is highly extensible and API-first. With SmartSign Plus, easily customize eSignature to fit within pre-existing applications and digital workflows. SmartSign Plus includes a turnkey integration with eOriginal® eVault, a market-leading eAsset Management solution that delivers Digital Asset Certainty - the assurance that transferable authoritative digital loans meet and maintain the highest level of legal enforceability and compliance.
