

CCH® Tagetik Analytic Information Hub

Datasheet

Harness the data. Gain the insights. Drive the business.

The CCH Tagetik Analytic Information Hub is a powerful information-centric data hub that can serve every organization by harnessing massive amounts of granular financial and operational data to uncover the hidden value and gain business insights for more informed and confident decision-making. The CCH Tagetik Analytic Information Hub extracts, collects, refines, normalizes, validates and transforms data into actionable information. The CCH Tagetik Analytic Information Hub eliminates mistakes caused by siloed systems, reduces the need for data reconciliation and simplifies data management. Owned and maintained by Finance, the hub is governed by the dataflow and audit trail to ensure Finance has control and confidence in the results. Through a single hub you get the data once, from any source, easily turn it into information, and use the information many times across all the organization, for all financial management reporting and analysis purposes.

CCH Tagetik Analytic Information Hub

Gain key insights

Perform in-depth modeling & analytics on more granular financial, non-financial and operational data, transforming data into actionable information to gain key insights. Extending the reach of CPM processes to detailed level provides a more accurate view of the results. In-depth planning, profitability analysis, or any other analytics all can be easily done.

Flexible data model

Open data model with no dimensional limitations, designed to handle large datasets with powerful mapping, data validation capabilities, and multidimensional formulas. Collect, refine, normalize, validate and transform data from internal and external disparate systems.

Easy to configure

Full custom data modeling with GUI interface for configuration vs. programming. With built-in operations and validations, you can easily define SQL statements, and functions and procedures that can be reused across the application, without relying on IT. CCH Tagetik is built to be Finance owned and maintained.

Implement quickly

Controlled and risk mitigation environment with enterprise security, workflow/dataflow, and audit trail. Software is quick to implement, non-disruptive to your current architecture and has a powerful ETL that easily connects to many source systems.

Serving financial management systems

The CCH Analytic Information Hub can be used stand-alone or as a single data source to serve all your financial management purposes: consolidation, budgeting and planning, profitability analysis, regulatory reporting and disclosures. Align Finance and Operations, gain transparency and accuracy with a complete 360° view of your information for insights and better decision making.

Platform for the future

The platform for all your data: from corporate performance management summary level data to complex regulatory contract level data to granular financial and operational data for analytics. With a high-performance engine that quickly processes large volumes of data, you have the platform for today and the future needs for AI, machine learning and predictive analytics.

“Today’s finance teams need to expand beyond CPM to perform in-depth planning, profitability analysis and analytics to ensure key insights for business decisions are backed by real-time numbers and solid analysis. As the finance role transforms, CFO’s are looking for modern technology to meet their needs for today and in the future.”

Anthony Marzetti
VP Product Management, Wolters Kluwer

Key Benefits

- **360° view of your data**
- **Gain insights for better decisions**
- **Highly performant on large datasets**
- **Align Finance & Operations**
- **Modernize Finance Technology**
- **Controlled & Secure**
- **Lower Risk & TCO**

Why CCH Tagetik

Finance Owned: Purpose built to be maintained by Finance, reducing TCO and dependency on IT.

Unified CPM Solution: Consolidation, Planning, Reporting and Disclosure in one solution.

Reliability: Our implementation team consistently delivers.

Cloud Without Compromise: On premises. On cloud. One solution. The choice is yours.

About Wolters Kluwer

Wolters Kluwer (WKL) is a global leader in professional information, software solutions, and services for the healthcare; tax and accounting; governance, risk and compliance; and legal and regulatory sectors. We help our customers make critical decisions every day by providing expert solutions that combine deep domain knowledge with technology and services. Wolters Kluwer reported 2020 annual revenues of €4.6 billion. The group serves customers in over 180 countries, maintains operations in over 40 countries, and employs approximately 19,200 people worldwide. The company is headquartered in Alphen aan den Rijn, the Netherlands. Wolters Kluwer shares are listed on Euronext Amsterdam (WKL) and are included in the AEX and Euronext 100 indices. Wolters Kluwer has a sponsored Level 1 American Depositary Receipt (ADR) program. The ADRs are traded on the over-the-counter market in the U.S. (WTKWY).

Why today’s businesses need the Analytic Information Hub

- **Insights and Strategy are Key:** CFOs are now expected to be more strategic, providing insights not just numbers, increasing the need for analytics and modeling on more detailed level data.
- **Expanding reporting demands:** Need to harness financial, non-financial, operational data from internal and external sources to meet new regulatory and ever-expanding reporting requirements.
- **Preparing for Future Technologies:** Artificial Intelligence, Machine Learning, Prescriptive Analytics require tools to handle high volume detailed data.
- **Moving to Data-Centric Technology:** One data source for all processes, eliminates siloed systems, reduces data reconciliation and simplifies data management.

CCH Tagetik Analytic Information Hub handles modeling and analytics on granular data putting Finance in control of their own data destiny!

Platform for all processes
Connect multiple systems and processes via data integration

Advanced reporting
Combine native reporting with data from all processes and MS Office

Quickly build and deploy new business solutions
Dept-specific, industry-specific or regulatory

Powerful Data Transformation
Integrate, collect, normalize and transform data

Empower solutions
Add granular data for more robust solutions and greater insights

Business owned
Low code/no code configuration, reducing IT dependency

Key capabilities

- **Collect & Store Data:** access granular financial, non-financial and operational data from diverse sources; adapt data structure to accommodate financial and operational needs; establish data hub
- **Validate & Control:** manage entire data lifecycle from source to disclosure; be accountable for the data flow, validation, accuracy, access, and auditability
- **Transform & Inform:** apply financial intelligence, rules, and knowledge; perform analytics, modeling & planning at the granular level; transform granular data into actionable information; generate multiple, auditable reports and outputs
