Introduction

This supplement is primarily for EPAC 2025 candidates, taking into account information published since the revision date of the 2025 print edition, i.e., between 01.04.2025 and 16.09.2025. The supplement also deals with any errors in the 2025 print edition that have come to light.

Please note to check EPO OJ of September 2025 for any further information.

The online edition of Visser available on the Kluwer IP Law website - www.kluweriplaw.com - is regularly updated and includes full commentary on these updates as well as amendments in view of recent Technical Board of Appeal decisions and new information from the EPO website.

The next print edition of Visser will be published in Spring 2026. This will include commentary on the 2026 edition of the Guidelines for Examination in the EPO.

The description, claims and abstract may contain chemical or mathematical formulae. The description and abstract may contain tables. The claims may contain tables only if their subject-matter makes the use of tables desirable. Tables or chemical or mathematical formulae presented sideways shall be placed so that the tops of the tables or formulae are at the left-hand side of the page.

They must also be sufficiently rich in contrast and suitable to be clearly displayed at a resolution of 300 dpi.

(2)(h) A page of drawings may contain several figures. Where figures drawn on two or more sheets are intended to form a single figure, the figures on the several sheets shall be so arranged that the whole figure can be assembled without concealing any part of the partial figures. The different figures shall be arranged without wasting space, preferably in an upright position, clearly separated from one another. Where the figures are not arranged in an upright position, they shall be presented sideways with the top of the figures at the left side of the sheet.
