

JB I PACES

Step-by-step support to turn evidence into everyday practice

- JBI PACES is a process-driven, quality improvement software developed by clinicians for clinicians. It provides evidence-based, standardized processes and methods to support safety and quality improvement initiatives that lead to better patient care.
- By incorporating JBI's proven **Getting Research into Practice (GRiP) approach** — a structured, step-by-step process that guides teams through effective change management — it's unlike other quality improvement tools with dedicated support and a practical framework to embed evidence into everyday practice.
- JBI PACES is more than just a tool — it's a comprehensive solution for evidence implementation. You gain access to an integrated suite of resources, including the **Manual for Evidence Implementation**, over 500 evidence-based audit criteria, and tailored JBI Evidence Summaries aligned to each audit topic. Together, these resources empower teams to drive meaningful, measurable improvements in care by turning evidence into everyday practice.
- JBI PACES is supported by evidence-based Audit and Feedback methodology to drive organizational change with the flexibility to integrate different models and frameworks. Audit and Feedback is a recognized, effective strategy for improving the safety and quality of care.

The need for improvement, and the challenges we face

Healthcare organizations have a duty to continuously improve the quality of care they deliver. Quality improvement initiatives are essential for enhancing patient safety, optimizing clinical outcomes, increasing patient satisfaction, and reducing healthcare costs. In the face of complex demands and rapidly evolving evidence, prioritizing continuous quality improvement is key to delivering safer, more effective, and patient-centered care.

What sets JBI PACES apart?

-  End-to-end support for evidence implementation and quality improvement projects
-  Embedded GRiP methodology for structured, step-by-step change management
-  Integrated evidence-based tools, audit criteria, and outcome measures
-  Dynamic reporting and visual results to support informed decision-making
-  Designed by clinicians for clinicians to fit real-world workflows

How JBI PACES can help

- ✓ Provides clinicians and teams with access to practical, evidence-based tools and processes to implement change projects
- ✓ Streamlines quality improvement activities through audit and feedback, tailored workflows, and dynamic reporting
- ✓ Supports collaboration, transparency, and accountability with clear role assignments, project tracking, and comparative analysis

The result?

Better evidence. Streamlined reviews. Trusted outputs.

➤ Access evidence that supports confident decision-making

Whether you're leading a practice change project or working to improve care quality, reliable access to evidence is essential. The JBI PACES software provides clinicians and teams with access to hundreds of clinically focused Evidence Summaries, offering clear, evidence-based recommendations aligned with your strategic goals.

With over 500 audit criteria available — and fully customizable to suit your local context — JBI PACES supports thoughtful, informed action. It's designed to meet you where you are and help move your work forward with clarity and confidence.

➤ Appraise evidence without the heavy lifting

When resources are limited and deadlines matter, finding and appraising evidence can be a major hurdle. JBI EBP Database is designed to reduce that burden.

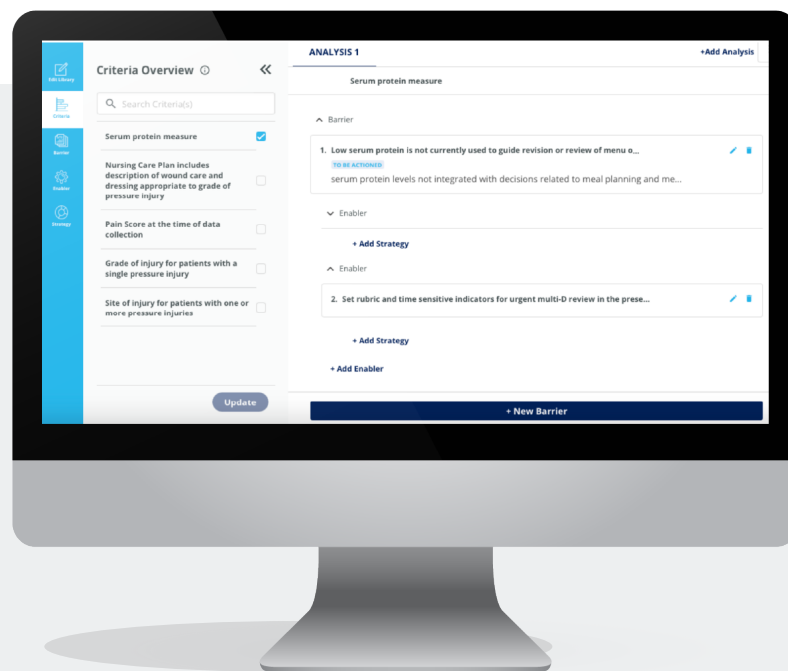

With more than 4,500 rigorously appraised clinical and leadership topics, it complements JBI PACES and integrates easily into existing safety and quality systems. It allows teams to begin projects with the assurance that their decisions are informed by dependable, high-quality evidence.

➤ Apply practical tools for real-world change

JBI PACES is purpose-built to support clinicians and teams through every stage of a change project. From setting up and managing the work to tracking progress and measuring impact, JBI PACES offers the structure and flexibility you need to achieve meaningful outcomes.

The platform includes whole-of-team access, tailored workflows, and JBI's Getting Research into JBI's GRIP unique solution-building module that helps teams translate evidence into practical, shared strategies. Developed through years of collaboration with healthcare professionals, JBI PACES is a tested, trusted tool for sustained improvement.

JBI PACES empowers teams to deliver safer, more effective, and patient-centered care through evidence-informed quality improvement.
