

Springer Nature Book Collections on Ovid[®]

For more than 150 years, Springer Nature Group has published innovative and groundbreaking research across a wide range of scientific, medical, and technology disciplines—and making that research as accessible as possible to the people that need it.

The industry-leading search and navigation functionality of the Ovid platform, combined with technology tools to optimize research discovery, gives users instant access to all 11 new collections and simple, intuitive ways to find the information they need for coursework, lectures, labs, discussions, presentations, exams, and patients.

11 new specialty-specific packages for students, faculty, residents, and clinicians

Why Springer Book Collections on Ovid?

- Quickly add over 150 premium reference books in clinical medicine and health science to your digital library
- Empower faculty, students, residents, fellows, and clinical staff to make new research discoveries and further their career
- Ensure easy access to high-value content on the Ovid platform
- Promote the value and use of your library throughout your institution

Key features of each collection:

- Highly regarded reference books from a leader in medical and health science publishing
- Simultaneous searching of multiple books within and across collections using just one search query
- Precise, natural-language searching for quick information discovery
- Time-saving workflow tools such as inline abstracts, search results sorting and annotations, and more
- Ovid's intuitive Book Reader: easily navigate within and among chapters and sections, adjust and expand images, and download and share with colleagues, study groups, and staff

**See page 2 for more details on the 11 collections.*
