

UpToDate Educate and UpToDate Lexidrug Integrated Patient Education Updates.

To maintain accuracy of updated patient education articles in your integrated access, you must take action.

UpToDate Educate – EMR Integration:

Please update any orders you may have built in your EMR for the retired patient education titles and Emmi codes listed in the crosswalk and replace them with the new titles and codes provided. These changes have already gone into effect due to a real-time update, so please make the requested changes at your earliest convenience to avoid any orders from failing. Please communicate to any affected providers as needed.

If an article was already ordered for a patient prior to us deleting it from the UpToDate® Educate database, the patient will see the updated content for this update.

Automated Batches:

Please update any line items in your UpToDate Educate batch crosswalk for the retired titles and UpToDate Educate codes and replace them with the new titles and codes provided. These changes have already gone into effect due to a real-time update, so please make the requested changes at your earliest convenience to avoid any batch scheduling from failing.

If an article was already ordered for a patient prior to us deleting it from the UpToDate Educate database, the patient will see the updated content for this update.

Updated Articles Available in Self-service Reference Site

All updates will be posted in this **Patient Education Articles Update** portal. Please bookmark this site and visit to see any updates. All updates will be posted in this site in PDF format with a clear date. Reminders and a link to the portal will be part of the UpToDate Patient Education Updates monthly newsletter.
