UpToDate Lexidrug Web Services

Hosted Web Services provide direct workflow access to referential drug information and educational leaflets while requiring less development

When busy healthcare professionals need a drug reference, access to timely information directly from their workflow application is an ideal solution.

As a delivery option, Web Services provide your organization with a method to not only streamline your development effort, but to reduce human and system resources on an ongoing basis. UpToDate® Lexidrug™ Web Services deliver rapid access to a variety of professional drug reference databases, supporting your team in providing an enhanced level of patient care.

With Lexidrug Web Services for professional drug information, you can:

- Provide professionals fast access to the most current information available; content updated in real-time throughout the day

- Save time and resources by eliminating the need to process data updates from Wolters Kluwer on a weekly or monthly basis

- Reduce the burden on your development team and environment with a solution that requires less infrastructure and demands on resources

- Enable flexibility with access to referential drug information using NDC, DIN, Medi-Span® Generic Product Identifier (GPI), document name, and more

- Support several list options, such as monograph titles, monograph fields/sections, charts and topics, pharmacologic categories, and more

Wolters Kluwer

- Format the presentation of information to meet the needs of your users with the ability to return content as XML or HTML

- Include the following trusted drug information databases:

  - Lexi-Drugs® (core adult drug information)

  - Pediatric and Neonatal Lexi-Drugs

  - Geriatric Lexi-Drugs

  - Lexi-Drugs Multinational

  - Dental Lexi-Drugs

  - A to Z Drug Facts

  - Off-Label Drug Facts

  - Drug Allergy and Idiosyncratic Reactions

  - Infectious Diseases

  - Pharmacogenomic

  - Toxicologys

Lexidrug Web Services also provides patient-facing educational leaflets for:

- Diseases/conditions

- Healthy living

- Procedures

- Discharge instructions, including emergency room discharge information

- Natural products

With Lexidrug Web Services for patient education leaflets, you can:

- Make it easy for your teams to quickly access the content they need by enabling access through searching or by creating a list of available leaflet titles

- Include graphics/illustrations to augment the text, as applicable

- Format the presentation of information to best meet your users' needs with the ability to return content as XML or HTML

- Engage patients or members of various backgrounds and needs with the option to include more than 4,500 educational leaflets, with the top 550 topics available in 19 languages* and the remaining topics in English and Spanish

Lexidrug Web Services are hosted in Microsoft Azure by Wolters Kluwer.

*Languages include: Arabic, Creole, English, French, German, Greek, Italian, Japanese, Korean, Polish, Portuguese, Punjabi, Russian, Simplified Chinese, Spanish, Tagalog, Traditional Chinese, Turkish, and Vietnamese
