

NCLEX® Readiness: Are your students prepared for the NGN and practice?

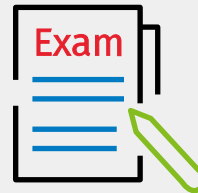

Are you aware of the increased emphasis on clinical judgment skills and the recent updates to the NCLEX-RN® test plan? Our latest research and new educator tools are designed to ensure that your students are fully prepared to succeed on the NCLEX® and in their careers.

Recent NCLEX-RN test plan changes and introduction of the Clinical Judgment Measurement Model (CJMM)

April 2023

Dichotomous scoring (1 point if correct/0 if incorrect); Polytomous scoring (0/1 or +/- if more than one answer).

CJE-RN Readiness Exam

Can predict your students' success on the NCLEX-RN.

CJE-RN Readiness Exam accurately predicts the pass rate for the NGN licensure exam.

Predictive Capability

99%

Nursing students with scores above **84%*** have a 99% probability of passing NCLEX® on their first attempt.

* Previous versions of this infographic had 70% as the cut score. After doing the research that correlated 70% as the score, we added scaled scoring to Lippincott Ready for NCLEX. A raw score of 70% scales to 84% in the product.

The study was conducted from February 1 through August 31, 2023.

23

Nursing programs participated in the study.

1,103

Nursing students participated in the study.

Students who took the Lippincott NCLEX-RN® Readiness Exam had a higher pass rate than the reported national average for first-time test takers.

96.1% (FTPR)

Versus nationally, FTPR for quarter 2 was 94.2% and quarter 3 was 90.7% (NCSBN, 2023).
