

UpToDate Lexidrug with Formulink

A solution designed to help you
reduce clinical variability and improve
formulary communication

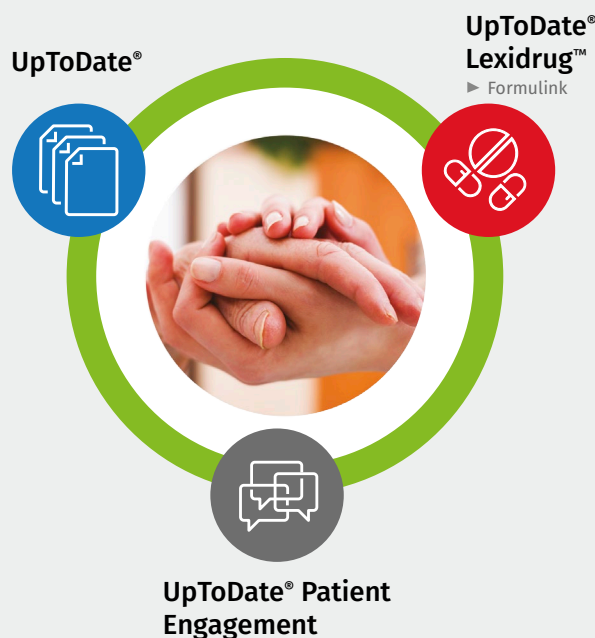

Busy pharmacy and clinical teams are challenged daily to make quick, efficient medication therapy decisions without compromising patient care. These teams need evidence-based, trusted solutions to align clinician teams, help standardize best practices, and improve communication and compliance around organizational formulary and policies.

Formulink custom formulary database integrates drug lists and organizational guidelines with trusted decision support content from UpToDate® Lexidrug™ and UpToDate®. In one quick search, Formulink helps enhance communications between P&T committees and prescribers, which improves operational efficiencies and adherence to formulary policy.

UpToDate Enterprise Suite: Unified solutions to support the decision-making workflow

Align teams across healthcare organizations with trusted, evidence-based solutions from Wolters Kluwer, including UpToDate Lexidrug (formerly Lexicomp®) drug reference. One unified solution suite helps streamline processes, improve communication, and enhance overall outcomes and patient safety:

- ✓ Continuous technology improvements
- ✓ Independent and rigorous editorial process by experts in their fields
- ✓ Regular content updates as new evidence arises
- ✓ Solutions are designed to work together with aligned content and functionality
- ✓ Patient engagement backed by human-centered design and behavioral science
- ✓ Usage and activity reporting
- ✓ Streamlined point of contact for all decision support solutions

Break the decision silos: Align care with a common playbook

UpToDate Lexidrug, a foundation for safe, evidence-based medication decisions

Give care teams a drug information reference based on strict editorial policies offering the best available evidence in a balanced, unbiased way.

Lexidrug represents a synthesis of practice experience, published literature, and clinical practice guidelines.

This clinically relevant, actionable information can help clinicians determine the appropriate drug at the right dose for each patient they care for.

More than 300 expert consultants and 150 internal experts contribute to developing Lexidrug content, including practicing or consulting pharmacists, physicians, subspecialists, and nurses.

Formulink integration into Lexidrug and UpToDate

Features:

- ✓ Users of both Lexidrug and UpToDate can view full Formulink content on both desktop and mobile app
- ✓ Customize Lexidrug and UpToDate drug monographs with hospital-specific formulary policies and procedures
- ✓ Create multiple custom formularies as needed
- ✓ Editing tools to easily update formulary at any time, or have Wolters Kluwer manage modifications

Benefits:

- ✓ Improve communication of formulary policies between P&T committees and prescribers
- ✓ Improve operational efficiencies and save clinicians' time
- ✓ Help reduce medication costs through better adherence to formulary policies
- ✓ Access formulary reports from within the application to assist in decision-making
- ✓ Standardize care practices and reduce variability across healthcare organizations with consistent access to internal guidelines and evidence-based practices
