

Ovid®'s comprehensive evidence-based support

As experts in health information resources, the library helps clinicians and others retrieve information for research purposes or projects in evidence-based practice (EBP). In that capacity, medical librarians are a critical but often unrecognized part of the healthcare team.

Despite today's emphasis on EBP, fragmented communication, duplicated efforts, and varying degrees of EBP expertise continue to hinder these efforts. The Ovid EBP Suite offers a comprehensive solution, combining curated EBP databases with workflow tools to standardize and streamline EBP projects, maximizing library impact and supporting successful institutional EBP efforts – from high-quality information retrieval to organization-wide collaboration.

Fast-track evidence-based research with EBP Suite's curated resources

This collection of specially curated EBP resources streamlines your literature searches, lets you retrieve ready-made summaries of systematic reviews, find current EBP practices, access economic results of EBP, and more. Included in this suite, and available through Ovid, are:

Evidence-Based Medical Reviews

- Anchored by the Cochrane Database of Systematic Reviews, Cochrane Clinical Answers, and Cochrane Central Register of Controlled Trials
- International content represented in two key NHS publications

Evidence-Based Health Collection

- Featuring systematic reviews from the European Union and Lippincott® Nursing Solutions Guideline Summaries
- A diverse collection that includes meta-analyses, health technology assessment reports, reports from patient care experiences, EBP scorecards, and more

New England Journal of Medicine

- NEJM Group journals, including its flagship publication and *NEJM Evidence*
- NEJM Evidence guides readers toward a deeper understanding of the statistical methods used in clinical trials

JBI Complete Collection 2024

- Premier source of EBP literature and literature summaries
- A unique EBP assembly of two journals, the JBI database, plus JBI software:
 - JBI SUMARI helps you evaluate 10 types of reviews; and
 - JBI PACES, an audit & feedback solution for EBP

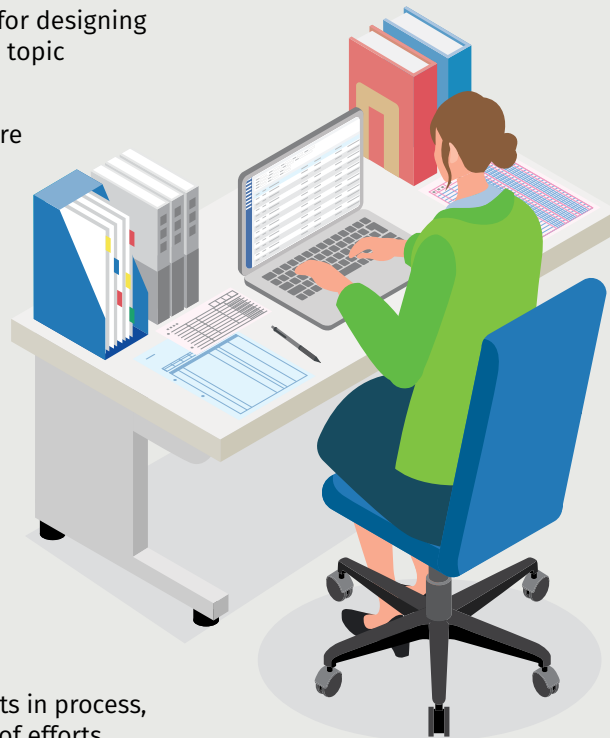

The Ovid EBP Suite offers:

- The most comprehensive, customizable collection of EBP resources available
- Top-notch evidence that meets the industry's most rigorous standards
- Flexible search features
- Resources at the point of need (and care)
- A total software solution to collect, evaluate, and synthesize literature to support EBP efforts.

All-in-one EBP project workflow solution: Ovid® Synthesis

The powerhouse that makes the databases work for you and walks users through all the steps of an EBP project:

- ✓ Step-by-step guidance for designing and researching an EBP topic
- ✓ A repository for literature searches
- ✓ Automatic “builds” of evidence tables from literature analyzed
- ✓ Online collaboration with team members, project leaders, and mentors
- ✓ Seamless generation and dissemination of final reports.
- ✓ Visibility of other projects in process, eliminating duplication of efforts

The Ovid® EBP Suite resources include:

Ovid Synthesis, a complete solution for developing EBP projects

Evidence-Based Medical Reviews

- Cochrane Database of Systematic Reviews
- Cochrane Clinical Answers
- Cochrane Central Register of Controlled Trials
- ACP Journal Club (two leading journals by the American College of Physicians)
- Archives of:
 - Cochrane Methodology Register
 - Health Technology Assessments
 - The Database of Abstracts of Reviews of Effectiveness
 - NHS Economic Evaluation Database

Evidence-Based Health Collection

- KSR Evidence
- ECRI Guidelines Trust®
- Evidence-Based Practice - FPIN
- Lippincott® Nursing Solutions Guideline Summaries

NEJM Bundle

- *New England Journal of Medicine*
- *NEJM Evidence*
- *NEJM Catalyst*
- *NEJM Journal Watch*

JBI Complete Collection

- JBI EBP database
- JBI Evidence Synthesis
- JBI Evidence Implementation
- JBI PACES (Practical Application of Clinical Evidence System) software
- JBI SUMARI (System for the Unified Management of the Assessment and Review of Information) software

Build expertise and improve patient care

The Ovid EBP Suite allows you to create, save, share, and revise searches as needed. Whether filing a request for abstracts or full-text articles, resources are available with a click.

When your institution uses Ovid EBP Suite resources, you have the opportunity to collaborate every step along the way on an EBP project. Your expertise and input can ensure the project starts with the proper focus, a comprehensive literature search, and an accurate appraisal of the search results. That groundwork, plus standardized templates in Ovid Synthesis, will help produce a polished final presentation and dissemination of findings.

Beyond tapping databases for information, the Ovid EBP Suite helps streamline your workflow and builds health literacy in EBP team members. Your hands-on experience, working in tandem with the Ovid EBP Suite resources, can teach healthcare providers how to access and evaluate information. That will lead to changes in protocols, clinical guidelines — and ultimately, better patient care.

Contact your Ovid representative, email sales@ovid.com, or visit our [website](#) to learn more about Ovid® resources for EBP.
