

Ovid[®] Synthesis

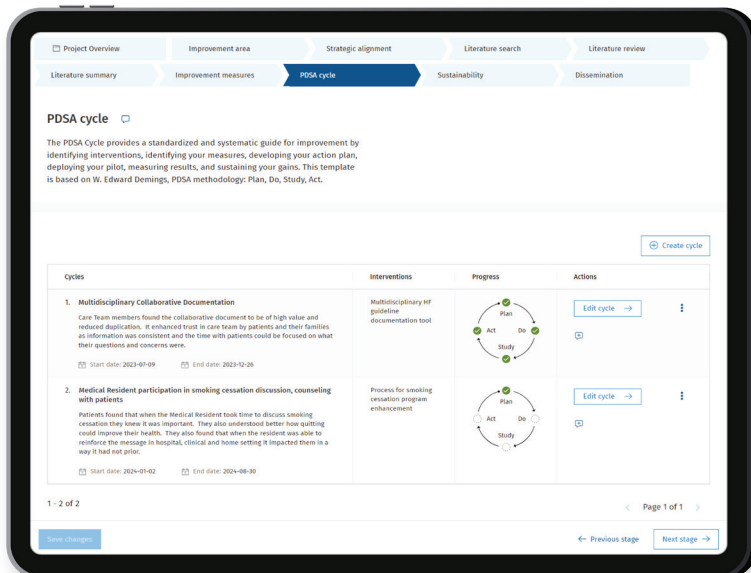

For quality improvement teams, educators, and those who prioritize improving outcomes, Ovid Synthesis provides a QI infrastructure that supports a culture of learning and improvement.

The challenge

For many QI team members, the biggest barrier to participation in QI projects is shortage of time, with increasing clinical and other demands:

- ⊗ Lack of standardized infrastructure
- ⊗ Varying levels of understanding of improvement science concepts and processes
- ⊗ Possible lack of knowledgeable mentors or organizational resources to implement projects
- ⊗ Challenges with coordinating and communicating within interdisciplinary teams
- ⊗ Lack of visibility of active or archived projects, resulting in duplication

The solution

Quality improvement is dependent on learning and experimentation, allowing healthcare professionals to innovate and improve the delivery of care. Ovid Synthesis workflow solution provides QI infrastructure across the organization, optimizes efficiency of operational processes, and can provide reduced costs to the system.

How Ovid Synthesis can help:

1

Efficiency:

- Eradicates silos, eliminates duplication, and fosters teamwork with a single source for projects
- Improves tracking and visibility of initiatives across the organization
- Facilitates quick and easy dissemination - seamlessly exports a Poster, PowerPoint, or Word Document
- Produces standardized reports for presentation to Boards and external partners

2

Quality & standardization:

- Supports a variety of quality improvement models including the IHI model for improvement, PDSA, DMAIC, and A3
- Standardized workflow templates and expert guidance provide assurance of project integrity and the validity of outcomes.
- Just-in-time guidance supports users of all levels with improvement workflows.
- Integrated Reporting Suite automates key initiative outputs including a poster, ROI calculation, initiative summary, and an evidence table.

3

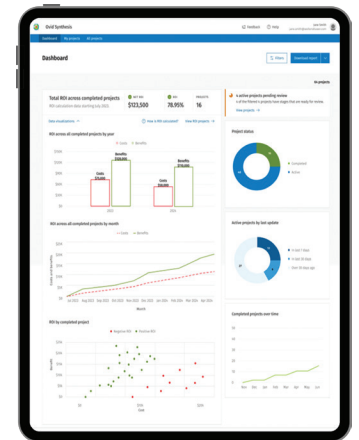

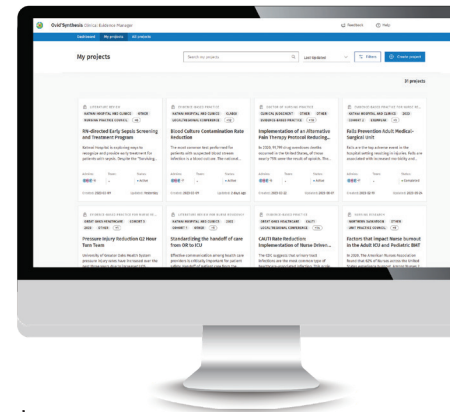

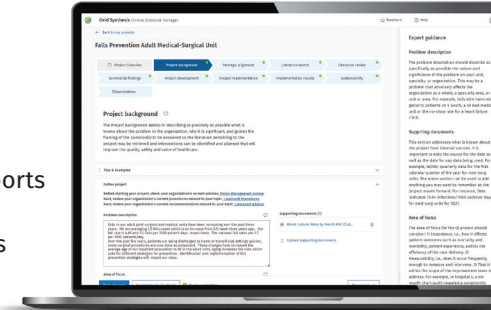

Collaboration

- Infrastructure supports a culture of collaboration, learning, and improvement.
- Transparency of project activity and outcomes builds an infrastructure that supports learning networks.
- Feedback mechanisms built into the product simplifies communication.

4

Realize ROI

- Built-in guidance to provide teams with readily available ROI framework
- Access to benchmark data for cost of outcomes to use in estimations when organization data is not available
- Increases the number of projects with ROI estimation to ensure cost-effective implementations and investments
- Automatically aggregates ROI data across projects to align with institutional goals

"It helps support information, it makes it readily available, it creates collaboration at multiple levels. And ultimately, it's stuff that we're doing but it seems as if it would make things infinitely easier and faster and more efficient." – CQO, Medical Center

"One of the distinctive features of Ovid Synthesis is its ability to turn project details into actionable insights." – NHS Trust
