**iLien Borrower Analytics**

Revolutionize borrower onboarding due diligence

Wolters Kluwer's iLien Borrower Analytics provides lenders with information about debtor's underlying assets, lien positions, and other risk factors in addition to the public records data extracted by iLien UCC search. These **actionable insights** are based on **expert-augmented intelligence extracted from UCC documents.**

UCC filing statement:

Collateral extracted:

All the debtor's assets as described in more detail in Exhibit A attached hereto.

Actionable insights:

Lien Type	Blanket Lien
Collateral Type	Accounts Receivable
1st Position Secured Party	ABC Bank

Supporting data provided:

1. **Any right to payment** for "Goods" sold or leased or for services rendered which is not evidenced by an instrument or chattel paper, whether or not it has been earned by performance ("Accounts")
2. All chattel paper instruments and documents
3. Accounts chattel paper, "General Intangibles"

Reduce manual workflow steps and costly legal review by using the metadata[1] and advanced analytics[2] offered by iLien Borrower Analytics. Results can be provided through a spreadsheet, PDF, or API.

iLien Borrower Analytics helps financial institutions to quickly evaluate and address potential risks. Let's discuss your needs, and see how we can help your due diligence process.
