

iLien Borrower Analytics

Revolutionize borrower onboarding due diligence

Faster, smarter lending decisions, powered by Expert AI insights ✨

Contact us today to schedule a demo and learn how iLien Borrower Analytics can transform your lending operations →

Today's lending environment demands speed, accuracy, and compliance. Yet, manual UCC reviews and fragmented data sources slow down decision-making and increase risk.

iLien Borrower Analytics moves past the traditional ways of operation, by leveraging Expert AI with both fully automated and expert human review options; delivering actionable insights and tailored reports — helping lenders streamline workflows, reduce costs, and make well-informed decisions with greater speed and accuracy.

Take control of your due diligence process, and stop letting outdated workflows slow you down.

Reduction of UCC search manual steps

iLien Borrower Analytics provides:

Actionable insights:

Easy-to-read reports with UCC filings, debtor and collateral change histories, and aggregated lien conditions

Comprehensive analysis:

Quickly identify conflicts and assess collateral status

Regulatory confidence:

Maintain audit-ready records and compliance with ease

Improved decision quality:

AI-powered review delivers accurate, consistent interpretations of collateral descriptions and identifies lien types (e.g., blanket liens)

Operational efficiency:

Consolidated public records search results in a single dashboard, saving up to 40 percent review time

Customization:

Tailored reports to your organization's specific needs for relevant insights

Post-filing verification:

"Search-to-Reflect" feature enables identification of pledged collateral

Enhanced reporting:

Instant, organized lien search findings in a comprehensive borrower report with greater transparency and access to critical details

Deeper discovery:

Comprehensive due-diligence searches across tax, judgments, litigation, bankruptcy, fixtures, agriculture, and community records

Flexibility:

Options for a fully automated solution with or without Expert Review for human oversight. Ability to execute Borrower Analytics on selected searches

Scalability:

Adapt seamlessly to changing loan volumes and varying complexity

Workflow integration:

Available for selected LOS systems
