

CT Corporation

Visibility is the key to compliance.

Managing Business Licenses is a critical but tricky part of your business. It's tough to stay on top of a full portfolio of filings and renewals with spreadsheets and reminders. Business License Hub simplifies and streamlines the process, saving you time and reducing risk.

Patchwork doesn't work

Manual systems that span multiple applications in an effort to manage critical business license filings and renewals can quickly become unmanageable. And, when manual systems do fail, falling out of compliance can have painful consequences ranging from fines and penalties, to loss of access to courts, loss of name rights—even business closure.

Software that works for you

CT's Business License Hub is a centralized, cloud-based tool that simplifies and streamlines the process of managing business license renewals and expirations. Instead of being constantly tethered to a home-grown manual system, the Hub works for you. The calendar-based tool keeps you informed of impending deadlines, so renewals are tracked accurately and filed on time. The Hub is designed to integrate smoothly with your workflow, giving you maximum flexibility in areas such as data fields, list views and reporting, so you can make it your own.

Work smarter, together

Because Business License Hub is cloud-based, it's mobile friendly and accessible from wherever your team is working for easy collaboration. The Hub removes barriers and improves efficiency by integrating with CT's entity management platform, providing strong license-to-entity relationships. If you do hit any bumps in the road, your dedicated CT representatives or our Support Team members are there to help.

What's driving the increased complexity?

- **Lack of information** – Information is hard to find online—sometimes it's not there at all.
- **Multiple licensing authorities** – Understanding and knowing how to comply with federal, state, and local regulations can be daunting.
- **Constant changes** – Regulations are constantly in flux, making it easy for things to fall through the cracks.

CT provides scalable and flexible business license solutions tailored to your specific requirements. Whether you need 5 licenses or 5,000, we offer both self-service and fully managed options to support your business.
