

## Prevention Pulse: News, Research & Expert Insights

Wolters Kluwer expert solutions are built for clinicians by clinicians. This newsletter shares industry news and information curated and developed by our clinical experts.

May 2025

### Our Experts Weigh In

#### Measles aren't going away anytime soon

As of April 24, 2025, there were over 884 confirmed cases of measles in the US and outbreaks happening in every region of the world. IPs must remain vigilant and prepared. CDC's [Interim IPC Recommendations for Measles in Healthcare Settings](#) offers evidence-based guidance for what might keep IPs up at night. Check out a newly published [ICHE Commentary](#) for actionable strategies (Frantzis, 2025). Stay aware of current case counts and details using the CDC website Measles Cases and Outbreaks, updated Fridays.  
- [Karen Jones](#), MPH, RN, CIC, LTC-CIP, FAPIC

#### SHEA Spring Recap

SHEA Spring, the annual conference for healthcare epidemiology, infection prevention, and antimicrobial stewardship, wrapped up April 30 in Champions Gate, FL. One common theme was the importance of partnerships and collaboration, especially as public health experiences change with the new administration. Read my recent co-authored piece about [how a collaborative effort in Michigan impacted nursing home infections](#) in this new Clinical Infectious Disease publication. - Karen Jones, MPH, RN, CIC, LTC-CIP, FAPIC
