

JB I SUMARI

Powering better evidence, one review at a time

- JBI SUMARI is a powerful, web-based platform that supports the full systematic review process — from protocol development to final report preparation — all in one intuitive tool. Built on JBI's gold-standard methodology, it helps researchers and clinicians create transparent, reproducible reviews that inform evidence-based decision-making.
- With built-in critical appraisal tools, structured guidance, and collaborative features, JBI SUMARI simplifies complex review processes and empowers users at every level to produce high-quality systematic reviews with confidence.
- Its process-driven report builder compiles inputs from each review stage and helps users create a complete, structured review report — ready for submission to any journal, including JBI Evidence Synthesis.

What sets JBI SUMARI apart?

End-to-end support for the full review lifecycle — protocol development, screening, appraisal, extraction, synthesis, and reporting reducing irrelevant noise

Embedded critical appraisal tools and flexible data synthesis options (quantitative, qualitative, prevalence/incidence)

Gather intelligence on resource usage and user behavior, enabling informed decision-making on content acquisition and library resource allocation, maximizing ROI.

Intuitive, process-driven interface with step-by-step guidance for novice and experienced reviewers

Built-in report builder and export options for seamless integration with external tools

New in 2026

JB I SUMARI product update

- ✓ Import multiple files from different citation databases at once
- ✓ Track import history for full transparency
- ✓ Undo or remove uploaded files if errors are identified
- ✓ Automatically remove exact duplicate records during import
- ✓ Identify and resolve potential duplicates more efficiently
- ✓ Navigate a more intuitive screening interface
- ✓ Generate an auto-populated PRISMA 2020 flowchart based on real-time decisions

JBISUMARI features

JBISUMARI provides rapid access to integrated tools that support systematic reviews at every stage:

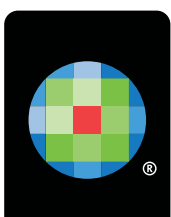

- End-to-end review workflow for protocol development, screening, appraisal, extraction, synthesis, and reporting
- Built-in full-text editor, citation manager, and pre-populated text templates for easy protocol writing
- Configurable screening workflows with conflict management and audit trail
- Embedded risk of bias tools for methodological quality assessment
- Structured data extraction templates with secure cloud storage
- Supports quantitative, qualitative, and prevalence/incidence synthesis
- Built-in report builder for publication-ready outputs
- Flexible export options for data integration with external analysis tools

Why choose JBISUMARI?

- ✓ End-to-end systematic review support in one platform
- ✓ Developed using JBI's internationally recognized, rigorous methodology
- ✓ Ideal for novice and expert reviewers with flexible workflows
- ✓ Facilitates collaboration and team management for multi-user reviews
- ✓ Enables transparent, reproducible, and high-quality reviews
