

JBI SUMARI

**NEW
& IMPROVED**

The new and improved *JBI SUMARI* includes features such as automatic generation of PRISMA 2020 flow diagram; the ability to screen studies within multiple study screeners, including logic to resolve conflicts, and to merge studies; separation of study screening to facilitate both title and abstract screening, and screening at the full text level; and proportional meta-analysis.

JBI's premier software for the systematic review of literature

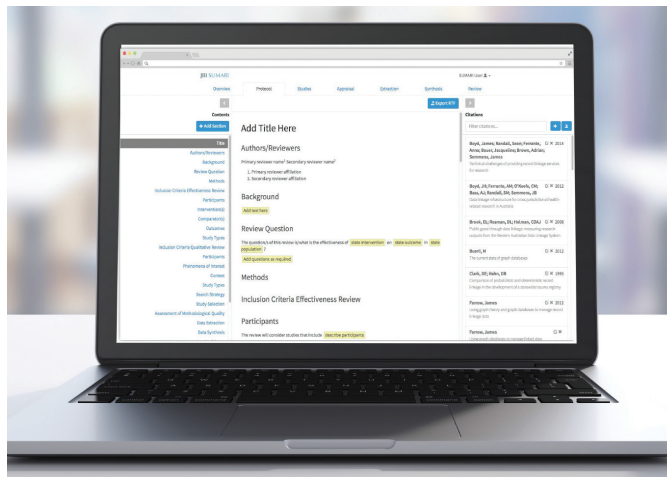

The System for the Unified Management, Assessment and Review of Information (SUMARI) is JBI's premier software program that provides end-to-end support for researchers and health professionals to conduct a systematic review from anywhere in the world. *JBI SUMARI* is designed to assist researchers and practitioners in fields such as health, social sciences and humanities in an easy-to-use web application.

JBI SUMARI supports the entire review process, from protocol development to writing the review report, and includes team and contributor management for effective and efficient collaboration.

JBI's premier software for the systematic review of literature

Why JBI SUMARI?

JBI SUMARI is a comprehensive tool for systematic review development and reporting, including developing a protocol, selecting studies, risk of bias/critical appraisal, data extraction, data synthesis (including metaanalysis in addition to qualitative synthesis) and writing a review report.

JBI SUMARI supports 10 different review types:

- Reviews of effectiveness
- Qualitative research
- Economic evaluations
- Prevalence/incidence
- Aetiology/risk
- Mixed methods
- Umbrella/overviews
- Text/opinion
- Diagnostic test accuracy
- Scoping reviews

Reviewers can also choose to include multiple approaches within a single review.

Who can use JBI SUMARI?

- Librarians
- Medical Researchers
- Physicians & Physician Leadership
- Nurses & Nursing Leadership
- Allied Health Researchers
- Academics
- CIO, System Administrators
- Biotech/Pharma Teams

Better Collaboration

Great flexibility to manage and designate roles for contributors and work concurrently with your team across the world.

Scientific Credibility

JBI SUMARI has been designed using JBI's gold-standard, rigorous systematic review methodologies, approved by an international scientific committee of evidence synthesis experts.

Multiple Review Types

JBI SUMARI, is the only systematic review software that facilitates 10 types of systematic reviews, including multiple approaches within the one review.
