

Section I (Chapters 1 and 2) Principles and Methods

Chapter 1 Principles and Methods 3

- Introduction to Principles and Methods 5
- Joint Range of Motion 6
- Assessment and Measurement of Joint Range of Motion 14
- Assessment and Measurement of Muscle Length 31
- Manual Assessment of Muscle Strength 34
- Practice Makes Perfect 53
- Functional Application of Assessment of Joint Range of Motion and Manual Muscle Testing 53

Chapter 2 Relating Assessment to Treatment 59

- Chapter Rationale 59
- Similar Assessment and Treatment Methods 60
- Key Steps When Applying Assessments and Treatments 60
- Examples of Similar Assessment and Treatment Methods 62

Section II (Chapters 3 through 9) Regional Evaluation Techniques

Chapter 3 Shoulder Complex 68

- Articulations and Movements 70
- Anatomical Landmarks 77
- Range of Motion Assessment and Measurement 79
- Muscle Length Assessment and Measurement 100
- Muscle Strength Assessment 102
- Functional Application 139

Chapter 4 Elbow and Forearm 147

- Articulations and Movements 149
- Anatomical Landmarks 152

- Range of Motion Assessment and Measurement 153
- Muscle Length Assessment and Measurement 163
- Muscle Strength Assessment 166
- Functional Application 179

Chapter 5 Wrist and Hand 189

- Articulations and Movements 191
- Anatomical Landmarks 198
- Range of Motion Assessment and Measurement 199
- Muscle Length Assessment and Measurement 219
- Muscle Strength Assessment 224
- Functional Application 257

Chapter 6 Hip 271

- Articulations and Movements 273
- Anatomical Landmarks 276
- Range of Motion Assessment and Measurement 278
- Muscle Length Assessment and Measurement 290
- Muscle Strength Assessment 298
- Functional Application 322

Chapter 7 Knee 329

- Articulations and Movements 330
- Anatomical Landmarks 333
- Range of Motion Assessment and Measurement 334
- Muscle Length Assessment and Measurement 339
- Muscle Strength Assessment 344
- Functional Application 351

Chapter 8 Ankle and Foot 359

- Articulations and Movements 361
- Anatomical Landmarks 364
- Range of Motion Assessment and Measurement 365
- Muscle Length Assessment and Measurement 384
- Muscle Strength Assessment 387
- Functional Application 409

Chapter 9

Head, Neck, and Trunk . . . 415

- Articulations and Movements: Head and Neck 419
- Anatomical Landmarks: Head and Neck 424
- Instrumentation and Measurement Procedures:
TMJ and Spine 426
- Active Range of Motion Assessment and
Measurement: Head and Neck 431
- Validity and Reliability: Measurement
of the TMJ and Cervical Spine AROM 442
- Muscle Strength Assessment: Muscles of the Face 443
- Muscle Strength Assessment: Muscles of the
Head and Neck 463
- Articulations and Movements: Trunk 469
- Anatomical Landmarks: Trunk 472
- Active Range of Motion Assessment and
Measurement: Trunk 474
- Validity and Reliability: Measurement of the Thoracic and
Lumbar Spine AROM 487
- Muscle Length Assessment and Measurement:
Trunk 488
- Muscle Strength Assessment: Muscles of the Trunk 489
- Functional Application: Neck and Trunk 501

Section III (Appendices A through E) Appendices

Appendix A: Sample Numerical Recording
Form: Range of Motion Assessment and
Measurement 513

Appendix B: Sample Recording Form:
Manual Muscle Strength Assessment 519

Appendix C: Summary of Patient Positioning
for the Assessment and Measurement of
Joint Motion, Muscle Length, and Muscle
Strength 525

Appendix D: Gait 529

Appendix E: Practice Makes Perfect—
Summary & Evaluation Forms 533

Index 541
