Practitioners and policymakers requiring an in-depth understanding of the conceptual framework of the abuse concept within EU competition law and how it relates to patent strategies will welcome this invaluable book. They will not only be able to set the conduct of applying for blocking patents but also have decisive tools to approach other questions on the intersection of patent law and competition law in the EU. One of its kind, this book provides a test scheme that can be used for further analysis and for proposing potential remedies making it highly valuable.
Competition Policy: An Empirical and Economic Approach
Emmanuel Combe

Competition Policy aims to explain competition policy through economic analysis of antitrust cases, focusing on Europe and comparing with the U.S. It is a truism of competition that, paradoxically, those responsible for yesterday's innovations and productivity become obstacles to future growth. At a time of increasing public concern regarding high industrial concentration, especially in the digital sector, the question of regulating competition is returning to the forefront. This utterly original book, which thoroughly explains competition policy using economic analyses, illuminates the complex but crucial back and forth between theory and practice.

Ex Post Evaluation of Competition Cases
Assimakis Komninos, Nicolas Petit

In its accumulation of evidence from individual cases that have steadily improved our ability to grasp the connections between policy choices and the outcomes they lead to, this volume is peerless. It comprises an invaluable resource for competition authorities in performing ex post evaluations and will be highly appreciated by practitioners and academics associated with European competition law.

Vertical Restraints in the Digital Economy: Vertical Block Exemption Regulation Reform and the Future of Distribution
Adina Claici, Denis F. Waelbroeck

Vertical agreements between undertakings at the various levels of a supply chain have long been seen as a fundamental focus for antitrust legislation, such as the European Union’s Vertical Block Exemption Regulation (VBER). It goes without saying that such issues are particularly prevalent in digital markets. This authoritative commentary analyses the main restrictions in vertical agreements, emphasising the numerous new and contentious issues arising in the context of Internet distribution. It offers both legal and economic perspectives, as well as examines enforcement and possible changes to the legislation.

Information Exchange Between Competitors in EU Competition Law
Martin Gassler

With a dearth of other available sources, this brief yet extensive review of a much-debated topic in competition law lends clear guidance to practitioners in assessing the issues surrounding information exchange. The book will also prove to be invaluable to competition law academics, competition lawyers and competition authority officials across Europe.

Price: € 112 - £ 99 - $ 125 | Format: Hardbound

Competition Law of the European Union, Sixth Edition
Van Bael & Bellis

Competition Law of the European Union provides a comprehensive analysis of the EU competition rules as developed primarily by the Commission, the General Court and the Court of Justice. The new Sixth Edition of a major work by the well-known competition law team at Van Bael & Bellis in Brussels reflects the many developments in the case law and relevant legislation that have occurred since the Fifth Edition in 2010. This edition follows the successful format of previous editions in covering all substantive and procedural aspects of the EU antitrust rules and merger control, as well as including a much-extended chapter on private enforcement and, for the first time, a dedicated section on competition law in the pharmaceutical sector.
