

Changing the game in lien management

Analytics and reporting

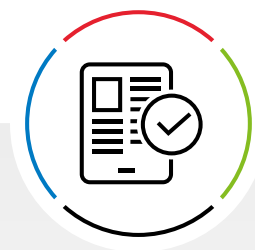

The lending landscape is changing. To meet lenders' evolving needs, Lien Solutions has changed the game with the most advanced, complete, one-stop iLien, focused on helping you with end-to-end management of your lien portfolio. Our new interactive Analytics tool with graphic summaries of performance indicators help you assess portfolio health, streamline processes, reduce risk, and ensure lien perfection. The expanded, self-serve Reporting tool offers the data you need, when you need it. By adding Analytics and Reporting to the Manage suite, along with Monitoring, Auto Continuation, and interface integration, iLien now offers an unparalleled set of capabilities to enhance your lien operations and a more holistic view of your lien portfolio that includes your data within iLien and public records data from the various jurisdictions.

Analytics

With interactive analytics using complete portfolio data from both iLien and Public Records, you have:

- Access to insights to mitigate risk and optimize processes
- Greater confidence in lending activities and decisions
- Information needed to take corrective action, improve quality, and avoid financial loss

Reporting

With your real-time data and iLien's easily customizable, out-of-the-box reports, you can:

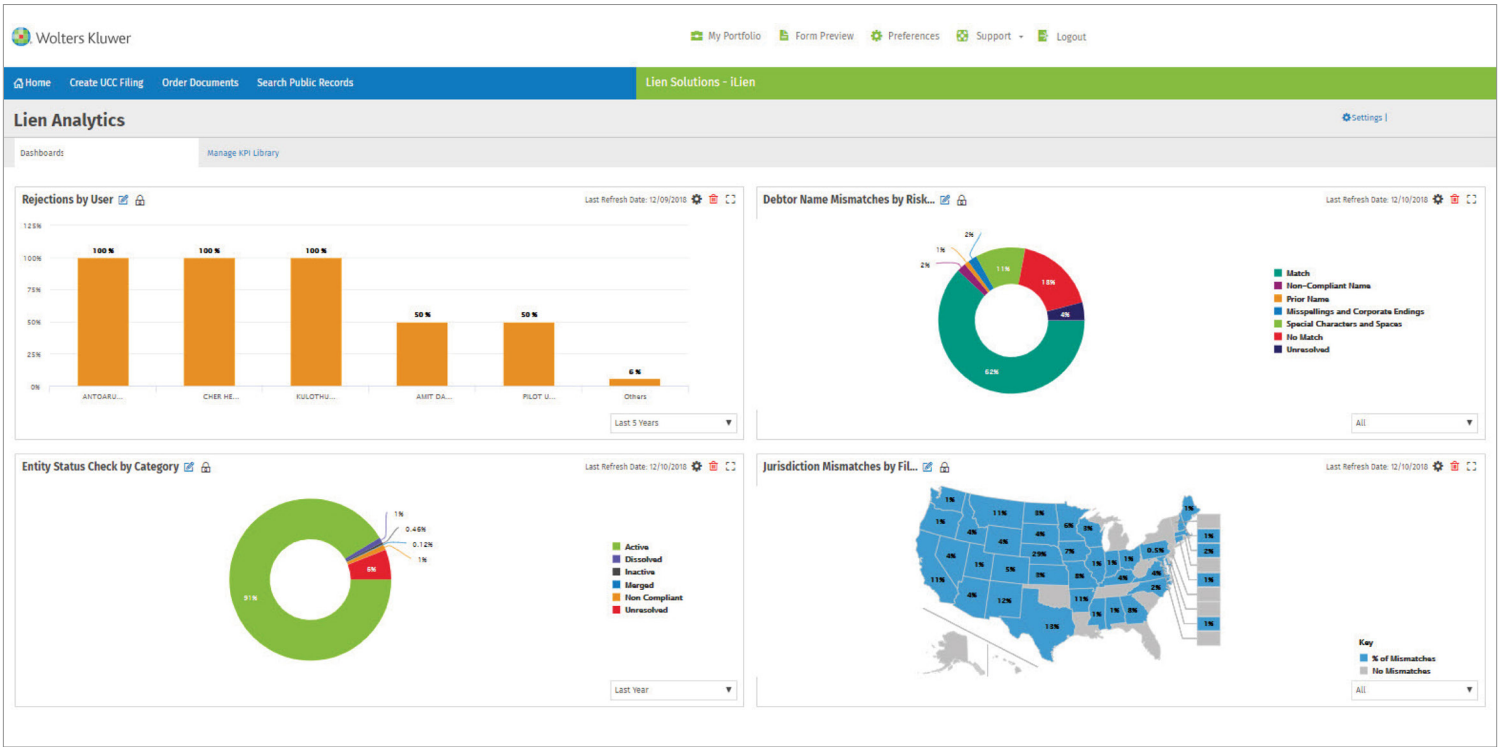

- Better understand your lien portfolio and operational health
- Customize reports with the data and fields you want, and generate these reports on-demand
- Access data from your linked accounts, seeing a more holistic view of your lien portfolio
- Serve all stakeholders the reports they need

Analytics

Analytics give you both the portfolio-wide macro view and the ability to drill down to understand what’s happening inside your lien portfolio and operations, and why.

- 
Multiple, customizable dashboards
 Visualizations that you can tailor to your organization and the needs of your stakeholders
- 
Unprecedented insights
 By adding Public Records data to Analytics, you have a complete, sophisticated view of your lien portfolio with minimal effort
- 
Key performance indicators
 Configurable metrics that help you evaluate risk, quality, efficiency, and filing volumes
- 
Drill down for details
 See the underlying data so you know how, and on what, to take corrective action

Reporting

Reporting makes extensive data readily available via an easy-to-use, self-service reporting option so you have the power to report the way you want.

Flexibility and customization

Modify existing out-of-the-box reports or create your own templates to meet the needs of your stakeholders

Convenient delivery

Schedule reports on your timeframe and have them automatically emailed to designated recipients

The screenshot displays the Wolters Kluwer iLien Solutions web application. The top navigation bar includes links for Home, Create UCC Filing, Order Documents, Search Public Records, and More. The user is logged in as Jonathan Smith. The main section is titled "Premium Reports" and features a sidebar with a list of reports: iLien Reports (Filing: 7, Search/Order: 3, Flood: 5, Other: 1), Special Reports, and Public Records (1). The main content area shows a grid of report categories with brief descriptions:

- Filing Volume**: Summarizes the number of filings submitted or processed in iLien. This report can group the data by transaction type or UCC Type.
- Recent Filings**: Identifies any filings submitted or filed within iLien for a given date range. This report can be customized to include all types of filings.
- Rejections**: This report lists any UCC filings that have been rejected by the jurisdiction. Rejection Reason and indication if the iLien user has "fixed" the filing are provided as additional data.
- On Hold**: This report will list any UCC filings that have been placed On Hold by Lien Solutions due to missing information. On Hold reason and On Hold date are provided as additional data.
- In Preparation**: This report will list any UCC filings that have been created in iLien but not submitted. iLien user information and Created Date are provided as additional data.
- Expired Filings**: This report will identify any filings that have Expired. The date of expiration and order details are provided as additional information.
- Allow to Expire**: Identifies all UCCs that have been explicitly "Allowed to Expire" or Terminated for a given date range by user.
