Budgeting Planning and Forecasting (BP&F) Solution Pro

CCH® Tagetik | ACADEMY

This learning path is designed to provide you the core knowledge, together with Tips and Best Practices, to efficiently maintain and manage your application. Remember that you can follow this path at your own pace, even if we recommend to respect the content and order we provide. The full learning path is the only way to get the most out of your CCH® Tagetik and of your time investment in becoming a real Certified Solution Pro.

Software version: 5.3.SP24

Welcome to the CCH® Tagetik Academy

This document contains the CCH® Tagetik Academy courses catalogue, with detailed information about optimal learning paths, duration, audience, prerequisites and topics covered in each course.

Which Learning Paths are available?

We designed recommended Learning Paths to maximize your investment in the Academy, according to your Role.

Each Learning Path shows the recommended classes and actions for an efficient on-boarding as a CCH® Tagetik Administrator, Contributor or System Administrator. Standard End-User training are available, while customized courses for End-Users can be developed on-demand. For more information about dedicated learning path, visit the [Customer-dedicated page](#)

What is the Academy Training Approach?

The Academy provides 2 main training approaches:

- **ILT - Instructor Led.** Courses are run as 'Live' classroom training, either in person or remotely. Instructor's explanations are conducted on a training environment and supported by PowerPoint slides. In order to make the training more efficient and interactive as possible, every attendee is asked to perform a series of hands-on workshops on a standard remote application.
- **Self-paced.** Self-paced courses are designed to be followed and completed at your own pace. Every self-paced course contains a theory part (from domain explanation to product technical details), a demonstration part with Videos or Simulation recorded on a training application and a dedicated time on a sand-box to practice with guided exercises.

The choice between ILT or Self-paced is done by the Academy according to the topic. You will find this information available for each course (Training Approach).

How can I register to a Course?

All our Public Training Courses are published on our Global Calendar on our [Academy website](#).

- You can check **dates, language, location** and **availability** for each Training Course and register directly for the selected event.
- ILT Courses can be held remotely, at Tagetik offices or on-site at the customer location.
- Even if we try to run all our scheduled classes, we might need to insert a minimum number of attendees for a training course (usually 3).

I'm interested in a Course, but I cannot find it in the Schedule. What should I do?

We usually publish our schedule on a 6 month basis, to better adapt to the market needs. If you cannot find a public date that suits your needs, you can always ask your Academy representative about opportunities to have an on-demand class.

On-demand classes are subjected to trainer availability and should be discussed well in advance.

For additional information, please contact your local Academy representative, or write to info.academy@wolterskluwer.com

BP&F Solution Pro Learning Path

Why should I follow this path?

This learning path is designed to provide you the core knowledge, together with Tips and Best Practices, to efficiently maintain and manage your application. Remember that you can follow this path at your own pace, even if we recommend to respect the content and order we provide.

The full learning path is the only way to get the most out of your CCH® Tagetik and of your time investment in becoming a real Certified Solution Pro.

Application Builder

- Data Modeling
- Output Reporting
- Data Collection
- Financial Modeling and Reporting
- **Application Builder Online Certification:** you can ask access to single assessment (one per course) or do all of them at once, at your own pace. Online Certification is optional.

Solution Specialist

- Process Governance and User Rights
- Planning & Forecasting
- Data Integration with DTP
- Data Integration with ETL
- Advanced Reporting

-
- (Optional) Data Integration with RESTful API
 - **Solution Specialist Online Certification:** you can ask access to single assessment (one per course) or do all of them at once, at your own pace. Online Certification is optional.

Solution Pro

- BP&F advanced (available from January 2024)
- Analytical Workspace Designer
- (Optional) Predictive Intelligence
- **Solution Pro Online Certification:** you can ask access to single assessment (one per course) or do all of them at once, at your own pace. Online Certification is optional.

Project-specific documentation deep dive

- this last milestone is **not** an actual course, but a recommendation from the Academy on how to complete your learning path.
it is vital to study your own project documentation to link the best practices, tips and features studied in the standard courses with your actual application.
It is also a great chance to review your knowledge and to understand if some areas need additional practice.

Data Modeling

Training approach: ILT - (Instructor Led)

Duration: 1 day

Audience: Administrators and Consultants

Prerequisites: Basic knowledge of MS Excel

Objectives: This training course covers the basics of data modeling and dimensionality: dimensions, datasets, aggregation structures, their definition and maintenance.

Topics:

1. CCH Tagetik introduction
2. CCH Tagetik architecture
3. Data model concepts
4. Interface navigation
5. Dimensions
 - a. System dimensions
 - Period
 - Scenario
 - Currency
 - Entity
 - Account
 - Category
 - b. Custom dimensions
 - c. Analytical dimensions
6. Aggregation structure
7. Analytical workspace
 - a. Datasets

Output Reporting

Training approach: ILT - (Instructor Led)

Duration: 2 days

Audience: Administrators, Contributors and Consultants

Prerequisites: Data Modeling, basic knowledge of MS Excel

Objectives: This training course explains how to design reports, using CCH® Tagetik reporting features.

Topics:

1. Reporting concepts
2. Excel client overview
3. Line by line form
4. Multidimensional form
5. Matrices
 - a. Filters
 - b. Parameters
6. Cell fields
7. Currency management
8. Time roll-up
9. Dynamic form design
10. Tagetik Style
11. Hyperlinks
12. Query
13. Smartinsight

Data Collection

Training approach: ILT - (Instructor Led)

Duration: 1 day

Audience: Administrators, Contributors and Consultants

Prerequisites: Data Modeling and Output Reporting

Objectives: This training course reviews the main data collection tools, and it shows participants how to run them. It also teaches attendees how to create and use data entry forms.

Topics:

1. Concept of
 - a. Data collection
 - b. CCH Tagetik process
 - c. Business workflow
2. Introduction of data collection tools
 - a. Predefined ETL
 - b. Quick data loader
 - c. Data transformation package
3. Data entry form design
 - a. Editability
 - b. Line by line
 - c. Multidimensional matrices

Financial Modeling and Reporting

Training approach: ILT - (Instructor Led)

Duration: 1 days

Audience: Administrators, Contributors, Consultants.

Prerequisites: Data Modeling, Output Reporting, Data Collection.

Objectives: This training course introduces the use of Financial workspace, the specific features of the system dimension, the basics of financial data collection tools and how to design report and data entry forms to collect financial data.

Topics:

1. Introduction to Financial workspace
2. Overview on built-in data processing
3. FW Data model features
 - a. Tables
 - b. Accounts and signs
 - c. Period length
 - d. Variation and details
4. FW Data collection tools
 - a. Predefined ETL
 - b. Financial workspace mapping
5. Output reporting, Financial statements templates and KPI
6. Data entry forms
 - a. In local and transactional currency
 - b. With control groups
7. Drill down
8. Data Submission

Advanced Reporting

Training approach: ILT - (Instructor Led)

Duration: 2 days

Audience: Administrators, Contributors and Consultants

Prerequisites: Data Modeling, Output Reporting, Data Collection, Financial Modeling and Reporting. Knowledge of MS Excel.

Objectives: This training course explains how to design reports, using CCH® Tagetik reporting features.

Topics:

1. Advanced dynamicity
2. Dependent parameters
3. Data validation
4. Override function
5. Data validation query
6. Form optimization
7. Performances
8. Design guidelines
9. Technical settings
10. Hide function
11. Conditional editability
12. Implementation of complex form
13. Managing dynamic form and complex formulas
14. Maintenance
15. Break back
16. Data processing from DE Form
17. Drill-through query
18. Form settings

-
19. Advanced FST formulas
 20. Reference FX rates
 21. Report Bursting (e-learning)
 22. Power BI (e-learning)

Process Governance and User Rights

Training approach: ILT - (Instructor Led)

Duration: 1 day

Audience: Consultants, Administrators, Contributors

Prerequisites: Data Modeling, Output Reporting, Data Collection, Financial Modeling and Reporting

Objectives: This training course enables to define the setup of the data collection components: starting from requirements, you will be able to create the business workflow, to configure all the process ingredients and to define the user rights of an application.

Topics

1. Business workflow
 - a. Step
 - b. Task list
2. Processes
 - a. Business cycle
 - b. Organizational hierarchy
 - c. Workflow mapping
 - d. Process data model
 - e. Rules and data processing
3. User rights
 - a. User rights on dimensions
 - b. Reference user
4. Application deployment

Planning and Forecasting

Training approach: ILT - (Instructor Led)

Duration: 2 days

Audience: Administrator, Consultants

Prerequisites: Data Modeling, Output Reporting, Data Collection, Data Integration with DTP, SQL Basic Knowledge.

Objectives: This training course introduces different concepts of planning and forecasting and shows the solutions to common planning and planning problems implemented with the tools of the Analytic information hub.

Topics:

1. Introduction to planning and forecasting
2. Data model trends
3. DTP operations to:
 - a. Split data across dimensions and time
 - b. Copy data
 - c. Pivot/unpivot table
4. Reference datasets for:
 - a. Configuration
 - b. Transformation
 - c. Assumptions
5. Virtual dataset and datasource to:
 - a. Retrieve and prepare data to process
6. Business cases on:
 - a. Top-down planning
 - b. Bottom-up planning
 - c. Driver based planning
 - d. Assumptions
 - e. Reporting

f. Versioning/Snapshot

g. Forecasting

Data Integration with DTP

Training approach: ILT - (Instructor Led)

Duration: 1 day

Audience: Administrators, Consultants

Prerequisites: Data Modeling, Output Reporting, Data Collection, Financial Modeling and Reporting and SQL basic knowledge.

Objectives: Attendees will be taught the different types of Datasets including standard, virtual and reference datasets. The course will teach participants how to configure the AIH calculation engine, called Data Transformation Package, and to use data integration tools in the business workflow. Furthermore, attendees will learn to use filters, parameters and dictionaries to enhance the capabilities of DTP and other data integration tools.

Topics:

1. Methods for loading data to Analytical workspace
1. Datasources
2. Use of dictionaries in AW
3. DTP with multiple steps of calculation
4. Aggregation functions
5. Main DTP operations (Insert, Enrichment, Join, Check)
6. Unpivoting data by DTP operations
7. Deploying data by DTP operations
8. Typical DTP filters
9. AW Parameters
10. Virtual dataset

Data Integration with ETL

Training approach: ILT - (Instructor Led)

Duration: 1 day

Audience: Administrators, Consultants

Prerequisites: Data Modeling, Output Reporting, Data Collection, Financial Modeling and Reporting and SQL basic knowledge.

Objectives: This training course covers the basics of the CCH® Tagetik ETL configuration module and provides best practices. Attendees will configure an ETL with mapping functionality that can load financial data for a Tagetik implementation. With this knowledge, they will also be able to update existing ETLs with new functionalities based on changes and/or new requirements.

Topics:

1. Introduction
2. ETL Overview
3. ETL Definition
4. Structure (ETL Domain)
5. E - Extraction
6. T - Transformation
7. L - Loading
8. Definition and Execution (data processing)
9. Troubleshooting and data analysis
10. Utilities

Data Integration with RESTful API

Training approach: ILT - (Instructor Led)

Duration: 1 day

Audience: Administrators, Consultants

Prerequisites: Data Modeling, Output Reporting, Data Collection, Financial Modeling and Reporting. Understanding of CCH® Tagetik ETL concepts.

Objectives: With the concepts explained, participants will learn how to expose and consume data as well as metadata within AIH via RESTful API. In addition, the training will provide information on performance, typical OData connections and the available types of authentication. Data orchestration concepts are also included. Attendees will be taught to use an API client to run workflows with AIH and maintenance data processing.

Topics:

1. RESTful API in CCH® Tagetik
2. How to configure CCH® Tagetik to use RESTful API
3. Consuming and exposing via OData
4. Expose metadata and Analytical dimensions
5. Data Target
6. Concepts of Data orchestration
7. Running Typical AW Data Processing using an API client
8. Performance
9. Available authentication and OData typical connections

Analytical Workspace Designer

Training approach: ILT - (Instructor Led)

Duration: 2 days

Audience: Administrators, IT Professional, Consultants with advanced Product knowledge.

Prerequisites: Data Modeling, Output Reporting, Data Collection, Financial Modeling and Reporting, Data integration with DTP.

Objectives: This training course covers the skills necessary to discuss, evaluate and choose among different design solution for AIH, including also technical considerations and advanced features to apply in project implementation.

Topics:

1. General overview and specific consideration of design
2. Dataset design
 - a. Use of different datasets
 - b. Naming conventions
3. DTP design
4. Solution design workshop and discussion
5. Technical aspects of Analytic information hub
6. Technical design guidelines

Predictive Intelligence Basic

Training approach: E-learning + ILT (Instructor Led)

Duration: 1 day

Audience: Administrators, Consultants.

Prerequisites: Data Modeling, Output Reporting, Data Collection, Data integration with DTP (or Data Model, Output Reporting and Data Collection, Analytical Information Hub Basic).

Objectives: This hands-on training course provides the necessary and sufficient knowledge to use the standard advanced analytics model in any CCH Tagetik environment, integrate data, run data processing and read the results.

⚠ Important: In this course the standard predictive model will be covered.

Topics:

1. Machine learning concepts
2. Time series terminology
3. Prerequisites and case study presentation
4. Analytical Workspace set up
5. Data preparation and normalization
6. Machine Learning tasks usage
7. How to read data
8. What if analysis – Comparison of different predictions
