Are you preparing the next generation of nurses for evidence-based practice?

“Ovid Synthesis is the most impactful thing to happen to nursing since disposable syringes”
— Program Manager, Evidence Based Practice

The challenges of EBP and QI for faculty and students

EBP and QI projects are increasingly a requirement in most nursing programs, from entry-level to advanced-level programs. At every level, they demand a significant amount of effort and supervision from faculty members.

Often these projects require students to take a prescribed set of actions, such as defining a question, carrying out a literature search, implementing a project and disseminating their findings to improve practice and outcomes. For students, this can seem daunting. Inexperience, lack of resources, and inconsistent support from knowledgeable faculty mentors can leave students insecure in their ability to successfully complete QI and EBP projects.

At the same time, faculty members monitoring and supporting many projects may struggle to get an overview that would allow them to track students’ progress and see where support is needed most to ensure students are following the correct processes.

How Ovid Synthesis can help

Ovid Synthesis is a software solution designed to support students at all levels to complete high-quality EBP and QI projects. It provides a structured, supportive online environment with easy access to full-text resources, and powerful oversight with dashboard and monitoring tools for faculty.

- Step-by-step prompts and guidance
- Built-in coaching and feedback capabilities for close collaboration between students and faculty
- Integrates with Lippincott®, Ovid®, and other major resources to ensure students reference the latest evidence
- Can be used “on the go” with an intuitive mobile app
- Works with existing curricula framework and is easy to integrate
- Provides faculty with dashboard view of projects across cohorts
**Ovid® Synthesis** fully supports the requirements across the Commission on Collegiate Nursing Education (CCNE), American Association of Colleges of Nursing (AACN) including Essentials. Enables faculty to support and manage all student project artifacts in one central location for compliance, survey accreditation, and security. With multiple cohorts, this can save hours of work needed to monitor, mentor, and collate projects.

**Easily integrates with program requirements and guidance**

- Ovid Synthesis for academic nursing programs includes two fully configurable project templates to standardize EBP and QI for nursing students in the courses you want to support.
- Begin with the standard entry-level or advanced-level program templates and tailor them to meet your school's needs.

**Find out how Ovid Synthesis can help you support students and faculty with a demo tailored to the academic programs you need to support.**
