

LegalVIEW® BillAnalyzer: The leader for AI-powered legal bill review

LegalVIEW BillAnalyzer combines artificial intelligence, and human legal expertise to help companies transform and optimize their end-to-end legal bill review process. Clients who take advantage of the award-winning managed service experience a reduction of legal spend as high as 10% compared to existing invoice review processes. BillAnalyzer leverages LegalVIEW®, the world's largest database with \$140B+ of legal performance benchmark and invoice data, to power AI-enhanced legal bill review. Implementing new bill review services into your organization can be challenging, but it doesn't have to be. Artificial Intelligence that leverages machine learning has significantly evolved over the past few years and has become highly adopted in the legal industry.

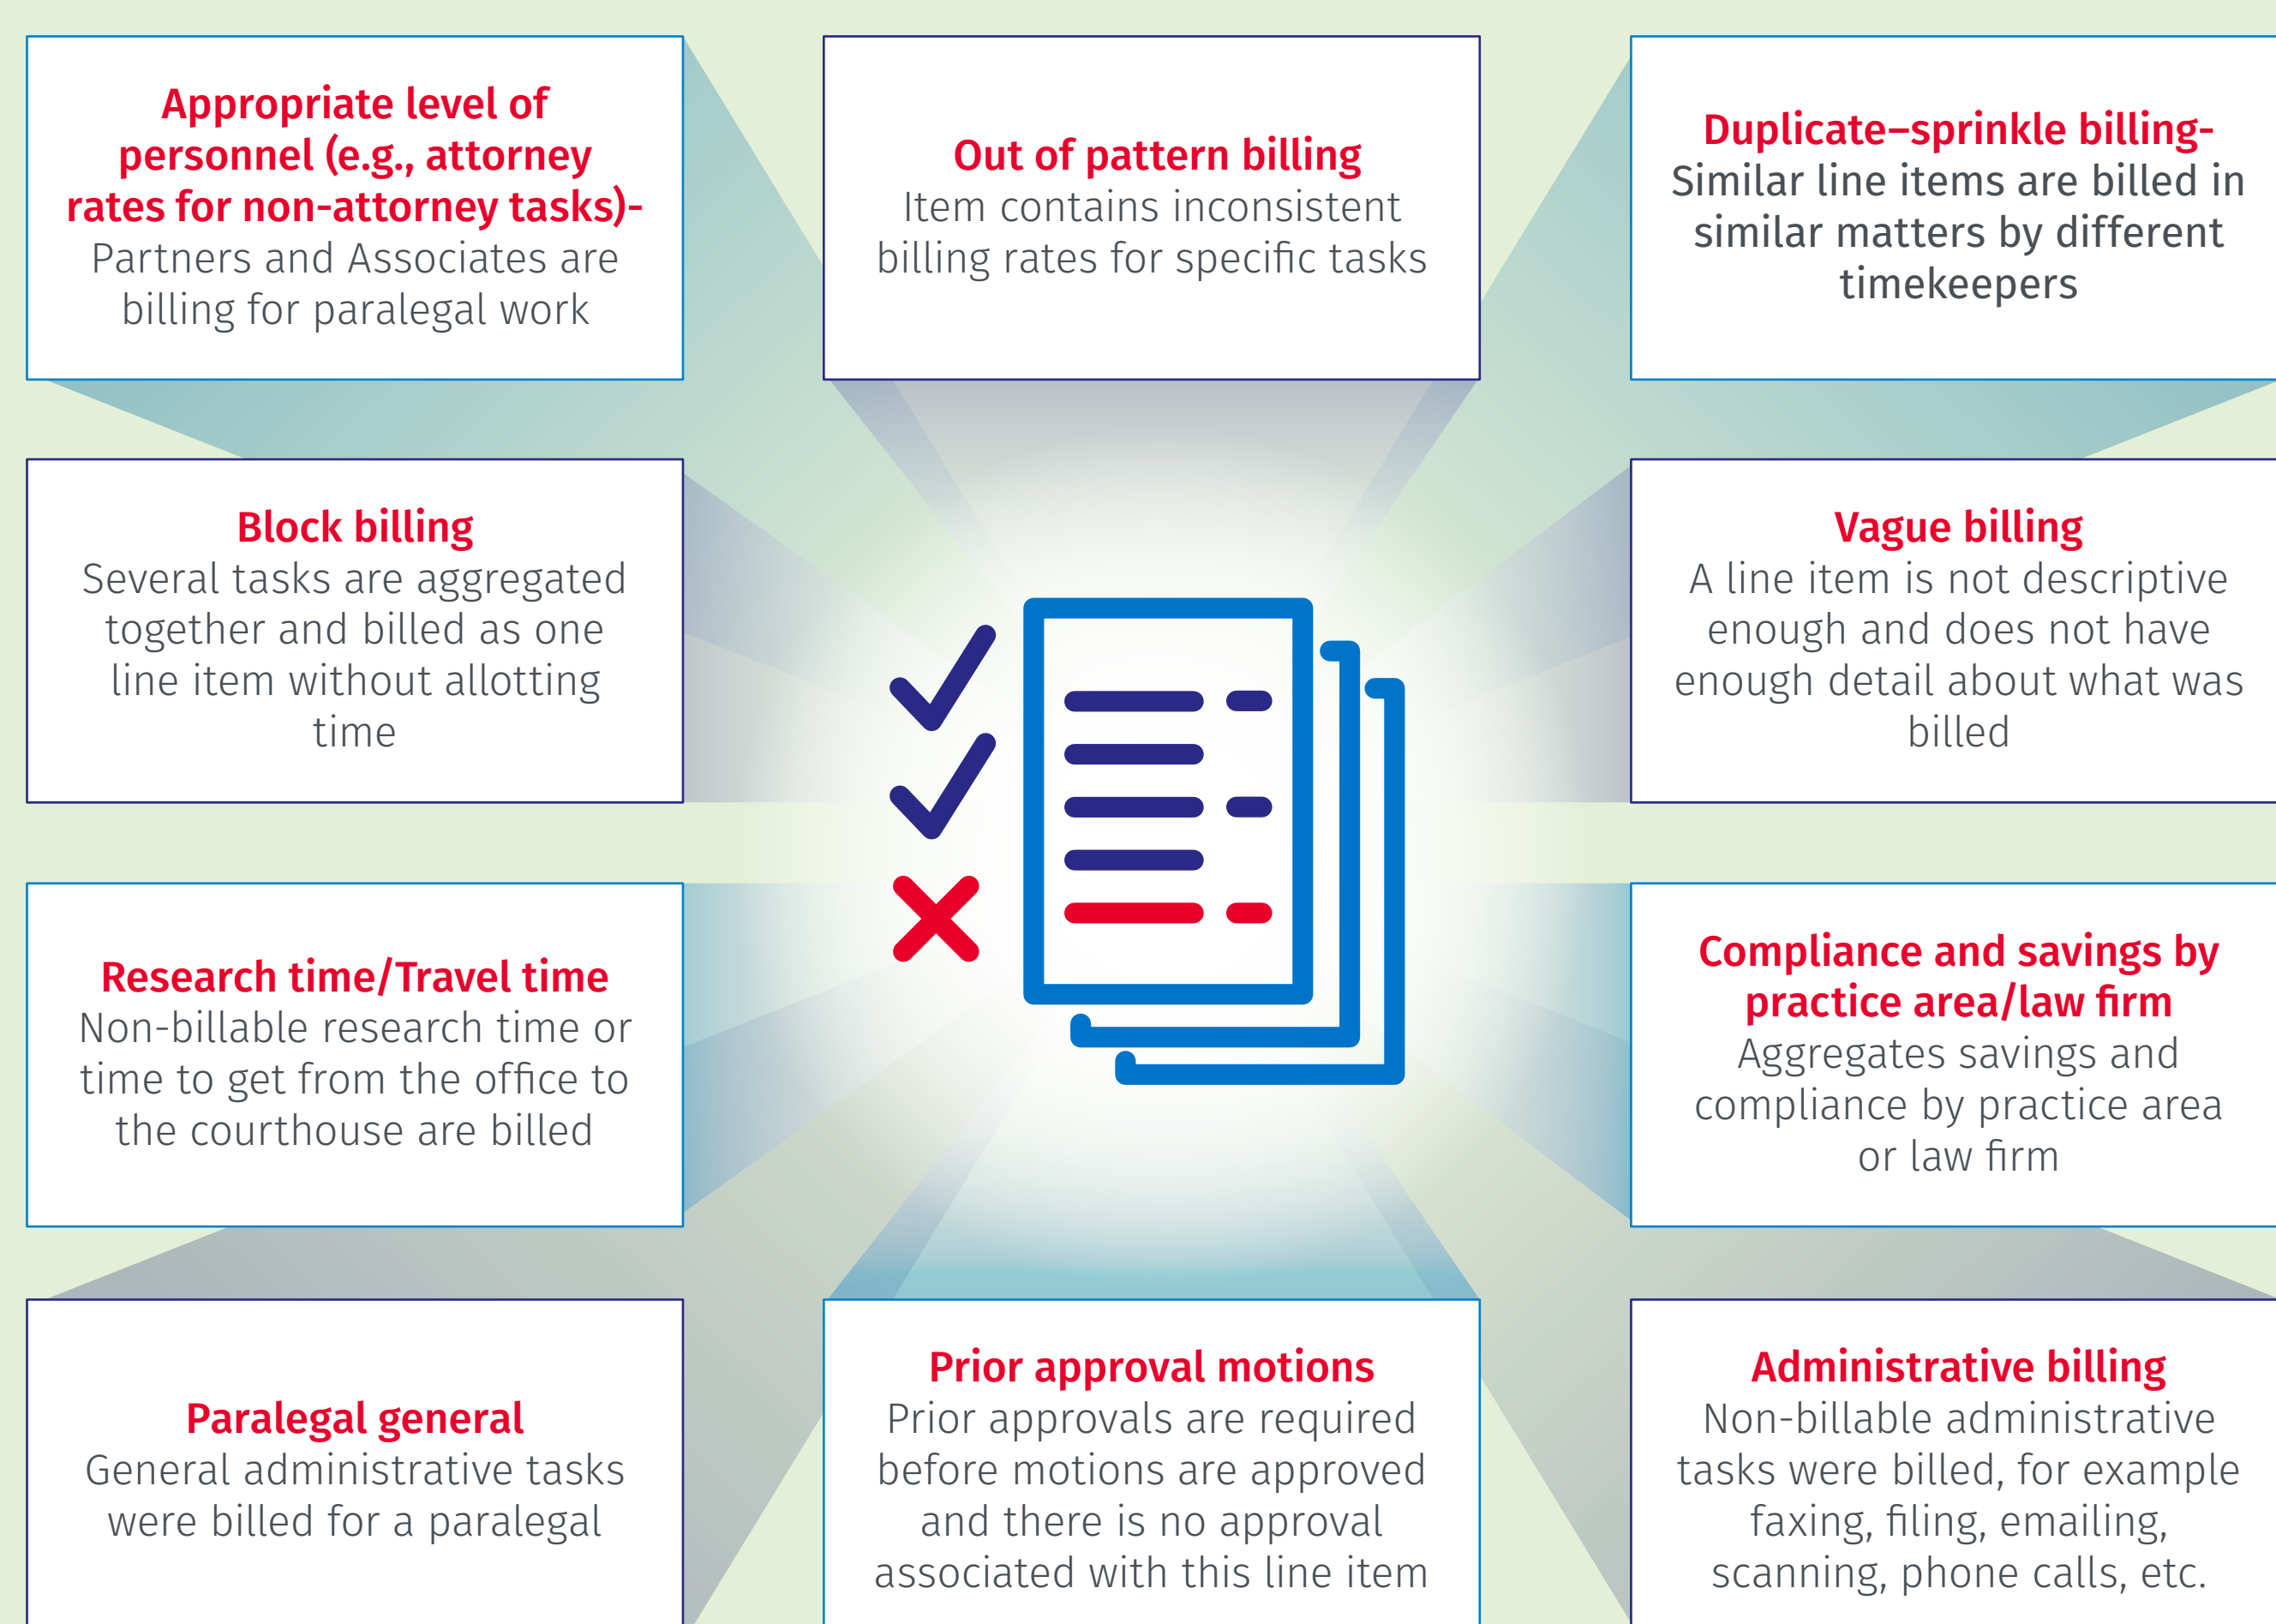

LegalVIEW BillAnalyzer vs. other legal bill review services

Many vendors claim to have an advanced and innovative AI model; however, **their models are rule engines and optical character recognition** based on client-specific data, often producing false-positive billing outcomes.

BillAnalyzer allows our data scientists to build in-depth AI and machine learning algorithms that use natural language processing to learn from the market and a client's guidelines to align with their goals and produce desired legal billing behavior patterns.

Billing violations captured by the BillAnalyzer AI model

Highly advanced AI model

The AI model is scalable for any size organization

Learned **140B+** in legal performance invoice data

Processed **2.5B+** in annual spend per year to date.

30M Historical line items
