

DATA PRIVACY

COMMITMENTS

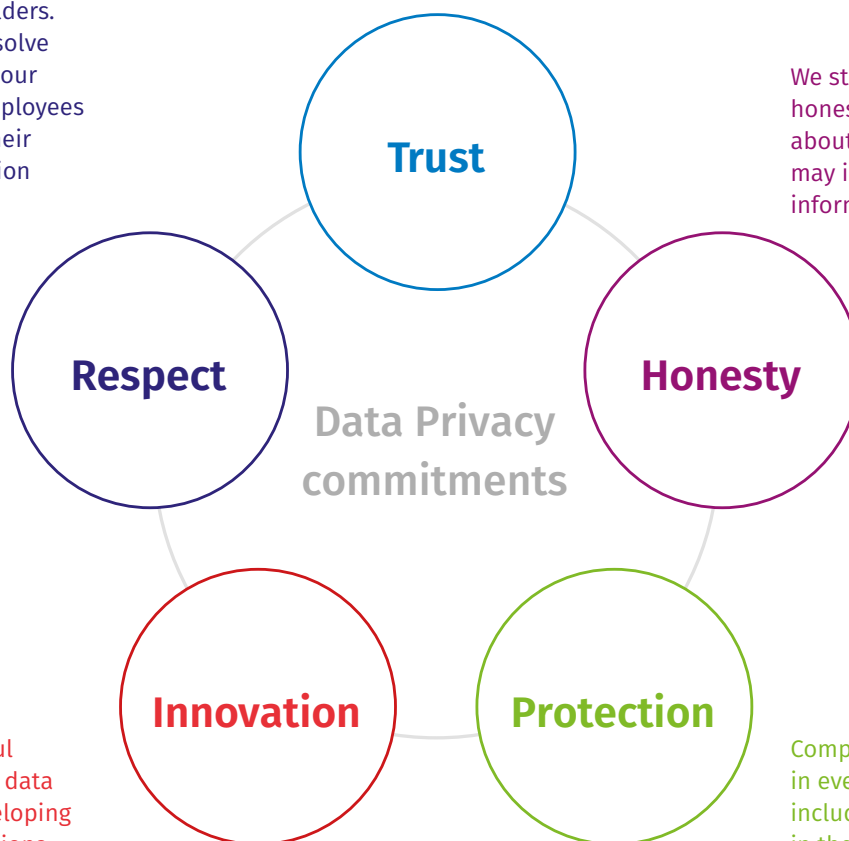

The starting point for everything we do begins with the trust our customers and employees place in us. Data entrusted to us is treated with care and respect. As a global provider of professional information, software solutions and services, we take data privacy seriously.

“ As we continue to enhance high performance technology and expert solutions, data privacy will remain a priority. ”

We foster a culture that respects the data privacy of our customers, their clients, our employees, and our other stakeholders. We will work to resolve any concerns that our customers and employees may have about their personal information entrusted to us.

Our customers are at the center of everything we do. We earn the trust of our customers, employees and other stakeholders by adhering to these data privacy commitments throughout our company.

We strive to communicate honestly and openly about our actions that may involve the personal information we process.

We have thoughtful discussions about data privacy when developing our software solutions and services and seek to embed data protection and data privacy in our development cycles.

Compliance is involved in everything we do. This includes privacy laws in the jurisdictions in which we operate. We are taking the appropriate steps to protect personal information and keep it secure.

We are committed to safeguarding the personal information of our employees, customers, and other stakeholders, while helping our customers, employees, investors, and society create a deeper impact and make the right decisions. Our Data Privacy Commitments are the core of our data privacy framework and are inspired by our company values. The Data Privacy Commitments guide our company-wide approach and express the value we attach to protecting the personal information of our customers, employees, and other stakeholders.
