

Comprehensive solutions for a constantly evolving marketplace

Today's R&D priorities are shifting, so you need both scientific knowledge and market intelligence to guide your steps. With more than 100 core and niche databases to draw from, Ovid® ensures you can get the information you need, when you need it, the way you need it — all from one integrated platform.

Here are a few examples of database portfolios typically used for various pharma/biotech/CRO functions. Each company's needs vary. Flexible subscriptions let you pick the databases best suited to your work.

Contact sales@ovid.com to learn how to put Ovid to work for your organization.
