

American Diabetes Association Content on Ovid[®]

The American Diabetes Association has been working since 1939 to provide information to educate the healthcare community and the public through funding research and educational resources on diabetes treatment and management.

Now over 20 ADA resources—4 journals, 16 books, and a journal collection—are available in a convenient book collection on the Ovid[®] platform. Two of the journals are highly cited and considered among the top-ranked publications in their area. And Ovid's precision search functionality and easy navigation means anyone doing diabetes research at your institution—physicians, nurses, students, product specialists—can easily uncover the information they need quickly.

*Premier journals
and books covering
important topics and
issues in diabetes
treatment, care, and
education*

Why Ovid for Access to Resources from the ADA?

- Offer easy, single-portal access to some of the field's most important and highly regarded informational resources
- Expand practice and learning opportunities for faculty, students, and researchers
- Enable them to take advantage of Ovid's workflow management tools to improve research efficiency
- Build the visibility and value of your e-resource library

4 ADA Journals Now Available*

- **Diabetes Care[®]** (2019 impact factor: 16.02) is the highest-ranked research journal focusing on diabetes treatment, care, and prevention, publishing peer-reviewed research for clinically oriented physicians, researchers, epidemiologists, psychologists, diabetes educators, and other health professionals.
- **Diabetes[®]** (2019 impact factor: 7.72) is the highest-ranked journal devoted exclusively to basic diabetes research and publishes original research articles on the physiology and pathophysiology of diabetes and its complications. Also features expert commentary on topical research, award lectures, meeting abstracts, and more.
- **Clinical Diabetes[®]** provides information on advances in state-of-the-art care and serves as a forum for discussing diabetes-related problems in practice, medical-legal issues, case studies, digests of recent research, and patient education materials.
- **Diabetes Spectrum[®]** offers diabetes educators and health care professionals timely and essential information to enhance diabetes self-management education and optimize patient outcomes. Includes peer-reviewed original research and review articles.
- **Cost-effective bundle of all 4 journals also available!**
