Urology is closely related to and overlaps with Nephrology. Often treatment on one affects the other and must be considered in research as well as management and treatment of conditions. Both of these areas also have indirect ramifications within nutrition, radiology, pathology, cardiology and transplantation. Researchers and practitioners study a wide range of topics and need access to the best resources to care for patients.

Make sure your users are up-to-date on the latest treatments, surgical techniques, and disease developments by giving them instant access to a suite of full-text resources in Nephrology and Urology via the one electronic information source they'll ever need—Ovid.
