

# CCH® ProSystem fx® Engagement

Drive high quality and efficient audits in one central hub.

#### What our customers say:

*“Now workpapers don’t need to be printed and so we no longer have hard copy spreadsheets being circulated in files. We can monitor who works and accesses client files and everything stays within the system. This gives both the firm and our clients a high assurance that our client data is both accurate and secure.”*

**Ng Chiaw Peng**

Audit Partner, Verity Partners

**Wolters Kluwer CCH® ProSystem fx® Engagement software has been trusted by the audit sector for many years – allowing firms to increase efficiency in the audit process while meeting regulatory requirements.**

#### The power of paperless engagements

- Monitor and control the progress of audit engagements, from start to finish.
- Streamline every step, from planning to electronic review to finalization and archival of engagement file.
- Manage your audit workpapers and financial statements through our dynamic trial balance links – ensuring accuracy throughout your audit documentation.
- Minimize the hours spent organizing your PBC (Provided By Client) list. Exchange your documents in a secure web-based environment.
- Support remote working; synchronization with the server ensures all team members are viewing the latest workpaper. Preparers and reviewers can do an electronic sign-off on the workpapers.

#### ISCA integration

We have partnered with Institute of Singapore Chartered Accountants (ISCA) to have the ISCA Audit Manual embedded into CCH® ProSystem fx® Engagement. Enjoy best of both worlds where you are able to use the unique CCH® ProSystem fx® Engagement functions in ISCA illustrative workpapers.

# TeamMate® Analytics External Audit

Deliver greater insights through deeper analysis of your financial data.

**Data analytics are a critical part of all business functions – audit is no exception. Use data analytics to inform planning, spot hidden risks by testing full data sets, and add value to your clients.**

#### Enhance your audit through data analytics

For external auditors who are challenged to improve audit productivity while delivering strategic insights, Teammate® Analytics helps you to easily perform powerful data analysis to deliver value to your audit engagements.

- **Data-driven approach for deeper insight**  
150+ powerful data analysis tools help to uncover hidden risks and deliver greater assurance to your audit engagement.
- **Be more confident in your findings**  
Testing against full data sets instead of a sample of the data across all audits means you are better able to identify and mitigate risk.
- **Download and run in your preferred environment**  
Operating within Excel, so no extra hours needed for training.

#### Review data in a fraction of the time:

- Use statistic sampling such as Monetary Unit Sampling
- Reduce sampling risk; see the full picture
- Focus on testing in higher risk areas

#### Improve client service:

- Provide deeper insights into records
- Identify control weaknesses
- Prevent loss by fraud or error

#### Help your business grow:

- Identify more issues
- Demonstrate your knowledge
- Perform new services

#### What our customers say:

*“Adding TeamMate Analytics to our audit workflow has changed our world. What used to take as much as 180 hours in years past, now takes as little as one hour. Our auditors can now deliver deeper insights to the client, thus enhancing the client’s experience.”*
