Permit to Work

Ensure every job is thoroughly planned, properly authorized, and transparently executed with Enablon's fully digital Permit to Work solution.

Gain real-time visibility into all ongoing and scheduled work activities to help teams stay informed and aligned.

Streamline your permitting process with smart rules, automated attachments, and defined approval cycles.

Save time drafting and issuing high-quality permits with the use of AI, pre-loaded templates, and permit copy functionalities.

Remain compliant with local and global regulations with a standardized and auditable system.

“The biggest advantage, other than the safety aspect of ePTW, is the ability to be compliant and for people to think better, think safer and think ahead of time and plan their work.”

Pfizer

Experience leading Permit to Work software

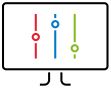

Create, modify, suspend, or delete permits
– from work orders to emergencies

AI-powered Permit Advisor that retrieves historical permits for reference, checks description quality, and recommends hazards and controls

Generate printable permits with toolbox talks and scannable barcodes for quick access

Define and track gas measurements with flexible verification intervals

Instantly create permits from work orders and accelerate drafting with MMS-integrated equipment trees

Unified solution that integrates permits, isolations, simultaneous operations and more into one Control of Work solution

*Wolters Kluwer
Enablon ranked
highest among all
vendors for its
Control of Work
solution in the
Verdantix Green
Quadrant: EHS
Software 2025*

Continuing our collaboration towards excellence
