
CAB Abstracts

Your access to the world's applied life sciences research

CAB Abstracts is the leading English-language bibliographic information service providing access to the world's applied life sciences literature through abstracts and access to full text.

CAB Abstracts gives researchers access to 12 million records from 1973 onwards, with over 500,000+ new records (not Abstracts) added each year.

Who uses CAB Abstracts?

CAB Abstracts is used by hundreds of the world's leading institutions, including 75% of US land-grant universities, together with many of the premier universities and research centres from across the globe. CAB Abstracts is truly the first choice for agriculture and related applied life sciences.

Access to full text

Full text is an integral part of CAB Abstracts. Over 60% of records added per year link to free full text available in open-access documents or in the CABI full-text repository. Over 800,000 documents are available in the permanent CABI full-text repository.

More core serials than any other database

A study published in the IAAALD Quarterly Bulletin revealed that CAB Abstracts covered more serials identified as core journals in agriculture than any other database that was examined.

- CAB Abstracts covers over 9,000 serials.
- Over 2,900 of these are not available on Scopus®.
- Over 3,700 of these are not available on Web of Science®.
- Over 5,000 of these are not available in PubMed®.
- Over 5,200 of these are not available on Biosis®.
- CAB Abstracts also covers more unique serials in agriculture and the applied life sciences, ensuring users have access to all relevant research.

-
- Publications from over 120 countries in 50 languages
 - Indexing over 10,000 academic journals, books, conference proceedings and reports specially selected by our subject experts
 - Find articles quickly with Ovid's powerful journal browse and search functionality, as well as flexible, time-saving results management and refinement tools.
 - Comprehensive subject indexing with the CABI Thesaurus, our controlled vocabulary tool, making searching easier and providing more precise access to ALL relevant research
 - The international focus of our CABI full-text repository means that your users have access to a wide cross-section of global research, giving the complete picture they need.

As well as indexing thousands of core scientific journals, CAB Abstracts offers extensive coverage of grey literature from around the world, including:

Annual Reports / General Reports / Handbooks / Bulletins / Monographs / Conference Proceedings / Newsletters / Discussion papers / Technical information / Field notes / Theses / Posters.

The international focus of our CABI full-text repository means that your users have access to a wide cross-section of global research, giving the complete picture they need. All areas of the world are represented, including developing countries.

Coverage

- Agricultural engineering
- Applied health
- Animal nutrition
- Animal production
- Applied economics and sociology
- Biofuels
- Biosafety and bioterrorism
- Biotechnology
- Breeding
- Chemistry
- Climate change
- Crop science and grasslands
- Ecotourism
- Entomology
- Environmental science
- Food science and technology
- Forestry
- Genetics
- Helminthology
- Horticultural science
- Human nutrition
- Invasive species
- Leisure and tourism
- Medicinal plants and pharmacology
- Microbiology
- Mycology
- Natural resources, land/water management
- Nematology
- Organic and sustainable agriculture
- Parasitology
- Plant pathology
- Plant protection
- Postharvest
- Protozoology
- Soil science
- Veterinary medicine
- Virology
- Waste management
