

Revenue Lifecycle Management for Telecom Equipment & Infrastructure Providers

As the telecom landscape modernizes, monetizing complex offerings across global networks requires billing systems that are as scalable and flexible as the infrastructure they support.

A Single Quote-to-Cash Solution for the Telecom Equipment & Infrastructure Industry

Companies providing telecom infrastructure and network equipment face a growing need to support usage-based pricing, partner agreements, and diverse commercial models across markets. Legacy systems struggle to accommodate evolving product catalogs, multi-layered contracts, and integrations with modern financial systems.

BillingPlatform empowers telecom infrastructure providers to simplify operations, accelerate billing cycles, and support revenue growth with a future-proof, cloud-native billing platform.

Implementing accounts receivable automation can reduce DSO by up to 20%, enhancing cash flow and financial health. [snsinsider.com](https://www.snsinsider.com)

BillingPlatform Supports Telecom Equipment & Infrastructure

Configure and price complex offerings across geographies, service tiers, and contract types

Automate usage- and event-based billing for network consumption, bandwidth, or device usage

Handle volume, tiered, and recurring pricing in a centralized product catalog

Integrate with CRM, ERP, and provisioning systems to unify the quote-to-cash process

Support multi-party account hierarchies to manage resellers, partners, or sub-customers

Ensure compliance and global readiness with multi-currency support and tax engine integration
