# UpToDate Enterprise Edition

A comprehensive clinical decision support solution that connects care teams and delivers superior outcomes for modern health systems

The care delivery landscape is changing rapidly. Modern health systems have to keep pace, not only with technological innovations, but with the growing complexities of their own organizations. As health systems, care teams, and patient needs evolve, achieving goals for both care quality and organizational efficiency become harder to balance.

To help you meet current and emerging challenges in the healthcare industry, **UpToDate® Enterprise Edition** expands on your trusted clinical decision support solution. This latest UpToDate experience for modern health systems unifies care teams and administrators with a focus on workflow innovation and patient-centered care.

## Maximizing value for care teams and administrators

For decades, healthcare professionals around the world have trusted UpToDate clinical decision support to enable confident decision-making and reduce variability in care. With UpToDate Enterprise Edition, your team has access to all that, plus advanced technology, features, and interconnectivity to support the shifting care delivery landscape, allowing you to:

- Improve business outcomes with self-service insights.
- Enhance satisfaction and collaboration by aligning all members of the care team to the same trusted UpToDate content.
- Prioritize quality of care with advanced content that enables confident decision-making in complex cases.

## Priority access to practice-changing innovation

Allowing health systems to unlock the most advanced innovations to:

- ➔ Partner with Wolters Kluwer and UpToDate to pioneer the responsible development of Clinical Generative AI with priority access to our **AI Labs**, the next phase in streamlined, accurate clinical decision support.
- ➔ Improve care quality and efficiency by revealing care team education needs and emerging community trends in the **Analytics Dashboard**.
- ➔ Enhance outcomes and reduce clinical variability through **UpToDate Pathways** and **Lab Interpretation monographs**, which feature easy, interactive decision points based on patient-specific variables.
- ➔ Accelerate growth with **ongoing access to the latest innovations** as soon as they become available.

*"I have been excited to work with Wolters Kluwer in developing their UpToDate Enterprise Edition analytics and dashboards. Using these tools, clinical and informatics leaders can appreciate the critical role UpToDate is playing in the daily practice of our caregivers."*

**Dr. Scott Smitherman, Chief Medical Information Officer  
Providence Clinical Network**

## The UpToDate Enterprise Edition experience:

### How it works for your health system

This all-inclusive UpToDate offering is designed for modern health systems, not only to help advance clinical practices, but to support administrative needs like:

Ensuring all clinicians have access to the same trusted content.

UpToDate Enterprise Edition portal, which provides on-demand access to insights and other valuable resources to maximize the reach and use of UpToDate across the organization.

Single Sign-On (SSO) authentication to enable a more efficient workflow and ensure consistent access regardless of care setting.
