

OneSumX Monitoring and Control

Financial institutions face increasing pressure to provide granular and comprehensive data for reconciliation purposes. Regulatory frameworks such as BCBS 239, SRB, and SREP are steering reporting divisions towards reconciled and qualitative data.

OneSumX Monitoring and Control solution empowers financial institutions by enhancing their ability to oversee and analyze data. Financial institutions can maintain control over their data, monitor business performance, ensure reconciliation across various reporting perspectives, and streamline reporting period closures. OneSumX Monitoring and Control reinstates control to the business user, furnishing proactive data insights for efficient back-office, i.e. finance, risk, and regulatory reporting pipeline management.

Features

- A centralized view of data information and quality.
- Increased data control with the ability to set thresholds and boundaries for data.
- Personalized data dashboard to display only the relevant thresholds.
- Ability to share insights and assign data ownership.

- Seamlessly integrate data from multiple sources to perform calculations.
- Migrate effortlessly using JSON format.
- Enable non-technical functional users with a no-code approach.
- Gain visibility of data trends and outliers.
- Versioned and auditable data rules.
- Extract data instantly from its source with a virtualized data layer, eliminating the need for complex ETL processes.
- Stay informed with automated notifications to owners and stakeholders.
