

CCH® Tagetik Smart NOW Cash Flow Planning

Datasheet

Get a firm grip on your cash position

If cash is always king, during times of uncertainty cash is a king on fire. To help you reduce financial risk and improve your liquidity, the CCH Tagetik Cash Flow Planning App equips you with the tools you need to forecast cash requirements and understand the cash impacts of changing market conditions. Whether you need to gauge your short-term needs, check the sustainability of an investment, or analyze the effects of new payment terms, this app puts your finger to the pulse of your cash position.

CCH Tagetik Smart NOW Cash Flow Planning

Fast & accurate cash flow planning

Always know much much working capital you have on hand. Use this app to monitor the impact of cash, net working capital, and net financial position on forecasts. Using dynamic reporting and analysis tools, you can produce detailed cash management analysis and focus on the most important ratios to satisfy your stakeholders' needs.

Pre-built solution

Pre-built with everything you need to reforecast your cash flow at a moment's notice, this app comes complete with built-in reports, dashboards, a chart of accounts, and financial intelligence for liquidity, interest rates, and currency hedging.

View impact on financial statements

Navigate market uncertainty with the tools to test your assumptions confidently. Instantly project cash flow scenarios to see the impacts on your fixed costs. When you need to vary financial policy rules like DSO, DPO, PL amounts, financing and investments, the app immediately showcases the P&L, balance sheet, and cash flow impact.

Simulate cash flow scenarios

Whether market conditions force change on you or you're considering a new course of action, simulate the effects of various scenarios to determine cash requirements or cash impacts. With rapid processing, you can update assumptions, adjust drivers and see the entire chain of effect on all corresponding plans and financial statements.

Powered by the analytic information hub

This app is powered by our data engine, the Analytic Information Hub, provides granular operational driver based planning, boosts performance, manages vast volumes of financial and operational data, speeds up calculations, and produces results in real-time.

Best practices, reduce it dependency

Developed for rapid deployment and ease-of-use, we packaged this app based on functionally requested by customers who've implemented custom cash flow solutions. With its user-friendly front-end, Finance can manage the solution, without depending on IT.

“Cash Flow Planning is an integral part of business today. With our quick to deploy app, all companies can get a handle on their cash position, plan for the future and immediately begin mitigating risks”

Anthony Marzetti

VP Product Management,
CCH Tagetik

Addressing common challenges

- **Changing cash requirements:** market uncertainty, changing strategy, unexpected business pivots — cash requirements are always changing. Make better decisions with instant simulations, scenario analysis, and reforecasting.
- **Long-term investments:** business moves quickly, and even the smallest change to cashflow can have cascading effects. Ensure your business decisions work for long-haul. Improve your visibility into the long tail cash effect of your investments to with instant forecasting, projections, and built-in cash flow intelligence.
- **Cost and time:** software implementations are notoriously long. But this app was built to get you up and running instantly. Pre-built and ready-to-go, it seamlessly connects with your existing planning infrastructure without any down time.

Features

- **Built-in cash flow reports:** when it comes to planning cash, net working capital and net financial position, instantly refresh pre-built reporting templates with the latest results. Drill-down into granular data to produce detailed cash management analysis that focuses on the most important ratios.
- **Create new asset plans:** plan new strategies and initiatives based on the “in-house” cash and long-term needs.
- **Standard cash flow chart of accounts:** break down the cash-in, cash-out, and cash-needed across all accounts and subcategories in a pre-configured chart of accounts.
- **Simulations and what-if scenarios:** simulate entity and consolidated balance sheet trends according to any scenario horizon (forecast, budget, plan). Simulate financial income and expenses to better gauge your short-term and long-term decisions.
- **Cash flow intelligence:** since cash flow is often "subject to change without notice" our built-in cash flow intelligence enables you to hedge liquidity, interest rate and currency.
- **View results on financial statements:** create an income statement forecast with financial and fiscal components with the confidence the balance sheet, income statement, and cash flow are perfectly matched.
- **Pre-built validation:** this app is pre-packaged with checks and balances that ensure balance sheet, P&L, and cash flow matching. Double entry logic ensures your balance sheet remains balanced.
- **Collaborative process workflow + audit trail:** streamline approvals, improve teamwork, and reduce bottle necks with a built-in workflow that gives administrators the visibility to produce cash flow reports faster. The app has built-in logic for approval and submission processes and for data collection and aggregation.
