

Ovid[®] Synthesis

Built in collaboration with nurse leaders who prioritize patient-centered care and quality improvement, Ovid[®] Synthesis is an evidence-based workflow solution to streamline EBP and QI.

Ovid[®] Synthesis is the only workflow solution that creates a culture of evidence-based practice and nursing excellence

Oversight

Save time and resources with high-level oversight of QI, EBP, and research projects.

Expert guidance

Bridge the gap between research and knowledge and provide guidance for all skill levels.

Standardization

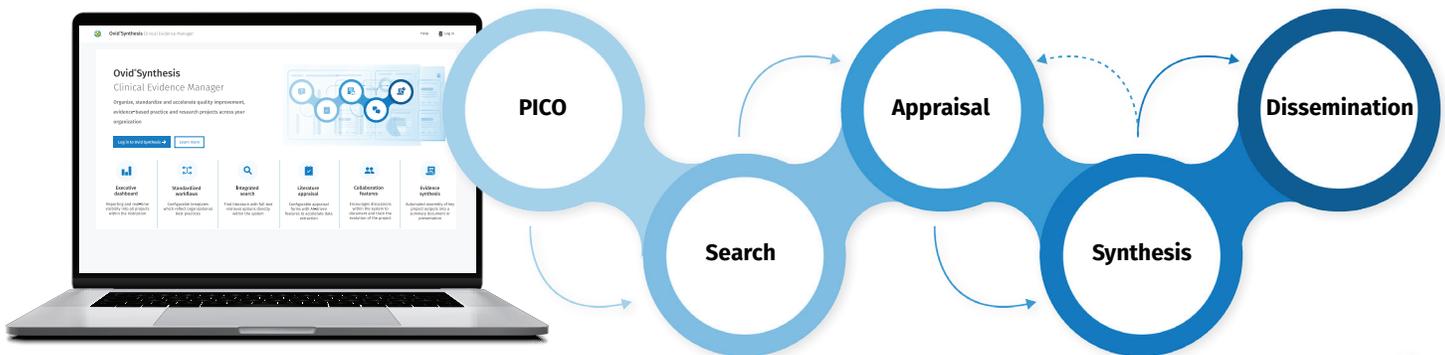

Standardize and streamline your program by leveraging technology.

Collaboration

Strengthen and collaborate across your teams, eradicating siloes and fostering a culture of EBP

Empower staff from PICO to Poster

"It makes completing all the steps of an EBP project much easier than any traditional method."

—Nurse Resident

"Ovid Synthesis is the most impactful thing to happen to nursing since disposable syringes"

—Program Manager, Evidence Based Practice

Who we help: nurse leaders

Hospital enterprise

All-in-one solution that advances patient-centered care, quality improvement, and patient safety. This package streamlines EBP and QI workflows across teams, departments, and all disciplines. Not limited to a specific use case, with customizable workflow and export templates for your institution or hospital system.

Nurse residency

Designed to conduct, collaborate, store, and manage all your institution's nurse residency projects. Provide new nurses with a standard structure to learn EBP from PICO to Poster, while you gain oversight and collaboration for mentorship, and infrastructure to retain and value your new nurses as they transition into practice.

Nurse excellence & innovation

Advances evidence-based training and knowledge, streamlines requirements, and provides infrastructure for Magnet® or Pathway designation and patient-centered care. This package provides built-in guidance and workflow templates for EBP, QI, Literature Review, ability to track critical compliance and survey data, and an export template that generates the Magnet OO11 Report.

Academic programs

Bridges the gap between education and practice and guides the next generation of nurses and clinicians on frameworks used in education and research. This package enriches DNP, BSN, PhD, and MSN curricula and competencies, enables collaboration between students and faculty, all while ensuring standards are met to support accreditation.

Find out how Ovid® Synthesis can help you support your program with a demo tailored to your needs.
