

**Transparent, investor-grade ESG management and reporting for
the next generation of sustainable business**

Enablon ESG Excellence

Enablon ESG Excellence

Bringing clarity to the complexity of ESG reporting

Enablon ESG Excellence empowers sustainability and finance leaders to collaborate so they can collect, report, and disclose verifiable ESG data – with the same rigor that key stakeholders have come to expect for financial data.

Simplify the complexity of ESG reporting.

Companies are now being asked to consistently report their progress toward ESG goals through a myriad of complex and evolving regulatory and voluntary frameworks and standards, including CSRD, GRI, CDP, TCFD, and SASB, among others. Enablon ESG Excellence is the transformational technology that empowers finance and sustainability leaders to collect and connect ESG and enterprise-wide data on an integrated platform, so they can meet their reporting obligations and earn the trust of key stakeholders.

Eliminate spreadsheets. Manage investor-grade ESG data from source to disclosure.

Spreadsheets and a patchwork of software applications – long the go-to resources for collecting and analyzing ESG-related data – no longer suffice for larger organizations that are committed to ESG. Building a credible ESG program requires auditable, accurate, and investor-grade ESG data that meets the demands of regulators and financial institutions. To ensure your data stands up to the highest levels of scrutiny, Enablon ESG Excellence centralizes and validates your ESG data from sources across the enterprise, cutting down time spent on data collection and simplifying reporting against multiple ESG standards, without duplicating efforts.

Foster enterprise-wide ESG collaboration.

Our unified data hub seamlessly connects ESG and sustainability data from any enterprise application, and then normalizes it into standardized indicators. Pre-configured reports, presentations and dashboards automatically update when data changes at the source, ensuring your teams can rely on timely and accurate ESG and sustainability information.

Reduce emissions and costs

What is good for the planet can drive value for your business. Enablon ESG Excellence offers advanced Net Zero program management and implementation for Scope 1, 2 and 3 GHG emissions, helping you decarbonize your operations, lower energy consumption, and drive down costs. Track greenhouse gas emissions down to the asset level to identify opportunities to further decrease energy use.

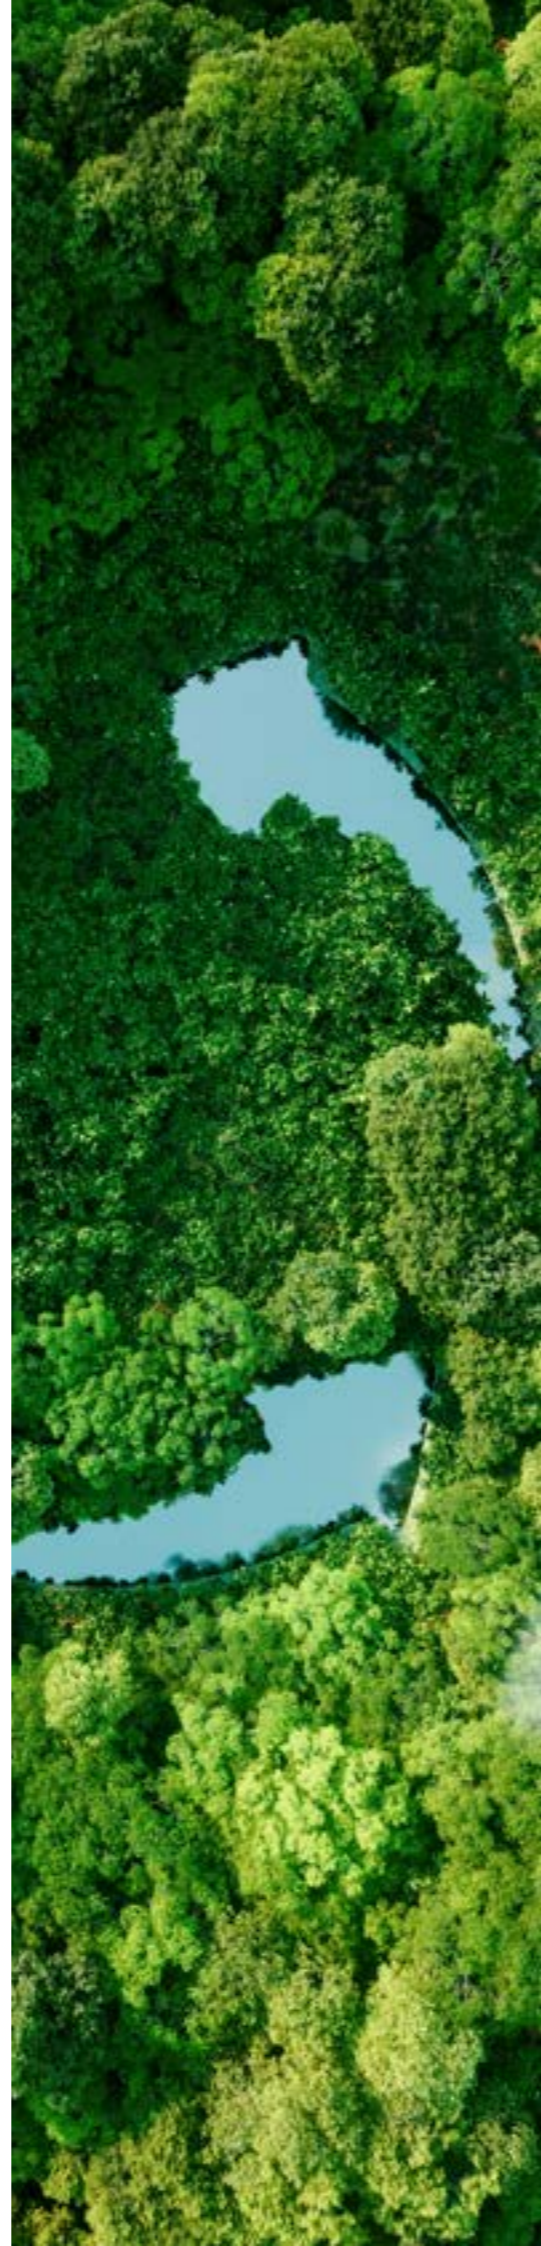

Accelerate your ESG and sustainability strategy to build a competitive advantage.

ESG efforts can – and should – be more than an annual “check-the-box” disclosure exercise. Enablon ESG Excellence helps you effectively manage your ESG program to uncover operational value. Perform comprehensive materiality assessments to identify and prioritize economic, environmental and social programs that are important to your stakeholders; and use actionable insights to inform your ESG strategy and enable accurate ESG reporting. Connect your ESG strategy to climate risk across your operations and prepare your organization for the next generation of regulatory requirements. Go beyond checking the box, to leverage your ESG reporting as a competitive advantage.

Results that matter

With Enablon ESG Excellence, you can:

- ✓ **Centralize and validate ESG data from 100+ enterprise applications** to track and optimize your ESG performance and disclose ESG metrics with ease.
- ✓ **Calculate framework-aligned KPIs and link them to ESG reports and dashboards** that automatically update when data changes at the source.
- ✓ **Facilitate dual accounting for Scope 2 GHG emissions** to meet the requirements of the most demanding reporting regimes.
- ✓ **Track granular emissions from field assets** and lower your environmental impact across the enterprise.
- ✓ **Enable deep collaboration** across sustainability, operations, risk management and finance.
- ✓ **Govern and monitor ESG reporting processes, from source to disclosure** with flexible, configurable workflows.
- ✓ **Develop configurable ESG reports and presentations,** combining narratives with numbers.
- ✓ **Publish trusted, auditable ESG disclosures,** based on traceable ESG data that aligns with regulatory requirements and meets the expectations of investors and stakeholders.

Technology that brings the rigor of financial reporting to the complex world of sustainability and ESG

At Wolters Kluwer Corporate Performance and ESG, we focus on helping companies drive the enterprise-wide digital transformation of their ESG efforts, just as our market-leading technologies have for more than a decade been driving the digital transformation of finance and audit.

Our Enablon platform is the world's leading suite of integrated software solutions for EHS, ESG, Operational Excellence, and GRC. Hundreds of industry-leading enterprises and millions of users, worldwide, rely on Enablon solutions to minimize risks, increase worker safety, prevent incidents from happening, achieve regulatory compliance, and reduce their environmental impact.

And our market-leading CCH Tagetik corporate performance management software is second-to-none when it comes to bringing clarity to the complexity of financial reporting, disclosure and analysis.

Now, by enhancing our Enablon ESG Excellence solution with reporting and disclosure functionality from CCH Tagetik, we're bridging the gap between EHS and finance to empower businesses to bring the rigor of financial reporting to the complex world of sustainability and ESG.
