

# UpToDate Educate: Integration with Epic

Create a seamless patient experience with integrated, harmonized content

Your patients see their educational materials as an extension of their care experience with your organization. With evidence-based patient education from the trusted, expert editors and designers from UpToDate®, your patients are in good hands throughout their care journey.

Wolters Kluwer is the only partner that promotes harmonized content. Our extensive collection of patient leaflets and compelling videos are developed by the same team that creates the world's leading clinical decision support, UpToDate. And, with a blend of leaflets in up to 20 languages, compelling videos, and modern, omnichannel delivery methods – you can meet patients whenever they seek health answers and wherever they are in their healthcare journey.

## Educate at the point of care

With SMART on FHIR, you can easily integrate our collection of leaflets and videos into Epic. Once integrated, your care teams can assign patient content with as few clicks as possible. With recommended content served up based on the patient's data, the care team member can then filter for the patient's preferred language, preview content at a glance, and assign it seamlessly.

The screenshot shows the Epic EHR interface for patient Sandy Smart. The top navigation bar includes links for Home, Schedule, Patient Chart, and Print. The main content area is titled 'Patient Education' and shows a list of recommended education topics for 'Diabetes mellitus type 2'. The list includes items like 'Diabetes Exchange Diet', 'Diabetes - Injecting Insulin: Vial and Pen', 'Diabetes - Foot Care', 'Diabetes Eye Exam', 'Introduction to Type 2 Diabetes: Overview', 'Daily Care for Type 2 Diabetes: Overview', 'Blood Sugar Emergencies for Type 2 Diabetes', and 'Diabetes and Diet'. A red box labeled '1' highlights the 'Introduction to Type 2 Diabetes: Overview' item. To the right, a video player shows a video titled 'Introduction to Type 2 Diabetes: Overview' with a red box labeled '2' highlighting the 'Send to patient' button. The video player also shows a 'Print for patient' button and a 'Send to patient' button. The video content includes a diagram of a cell and a text box explaining that the body can't turn sugar into energy unless it gets into the cells, and that it can't get in without a key, so think of 'insulin' as the key.

1. Recommended education based on patient data
2. Assigned in patient portal and documented in patient record

Representative screens only, not actual

For Epic clients who are not using SMART on FHIR, patient leaflets can also be accessed as follows:

- **Clinical Reference Activity** – Helps the clinician to quickly locate patient education and clinical reference documents relevant to the needs of the patient.
- **Discharge Instructions Navigator** – Helps the clinician to quickly locate discharge instructions relevant to the patient's language, diagnosis, and treatment plan.

## Educate at the bedside

### MyChart Bedside Content Linking

Provide patients access to information concerning their current inpatient visit through the My Chart Bedside tablet application – including a blend of compelling videos and extensive leaflets from UpToDate Educate.

## Educate at home, or on the go

### MyChart

Help your patients feel better engaged with your clinicians and improve health literacy by providing access to patient education leaflets through Epic's MyChart patient portal. Linking allows patients to access educational materials for the specific allergies, medications, test results, immunizations, health issues, and preventive care reminders they see in MyChart.

### Home Health NDC Linking

Help your home health patients feel better engaged with their assigned home healthcare provider and improve health literacy by providing the home healthcare provider access to patient education medication leaflets through EpicCare Home Health. Linking allows patient education content to be loaded to a laptop so that home healthcare providers will have direct access to educational materials to be shared and reviewed with patients.

## Educate your community, 24/7

As part of your UpToDate Educate access, your organization receives access to a co-branded website that allows you to support your community with trusted health answers. Health consumers can search and browse to find the answers they seek – from a trusted source that stays current and promotes alignment between patients and their provider.

The screenshot shows the 'Explore Health Answers' website. At the top left is the 'HEALTH FIRST MEDICAL ASSOCIATION' logo. The title 'Explore Health Answers' is centered, with 'Powered by UpToDate®' below it. On the top right is a language toggle 'AA español'. The main visual is a top-down view of a doctor's desk with a laptop, stethoscope, and papers. Below this is a search bar with the placeholder text 'What can we help you find?'. Under the search bar, a 'Categories' section displays four tiles: 'Heart and blood vessels' (with a heart diagram), 'Infections, vaccines, and public health' (with a person and network diagram), 'Emergency medicine' (with an ambulance), and 'Healthy living, nutrition, and movement' (with four people icons). A 'See More Categories' link is below the tiles. The footer contains the 'Wolters Kluwer' logo, links for 'Disclaimer', 'Privacy &amp; Cookies', 'GDPR', and 'Securities Act Statement', and a copyright notice: '© 2021 Wolters Kluwer. All Rights Reserved.'
