Telehealth Survey Results

We asked US instructors, program directors, deans, and academic faculty about their telehealth experiences.

Most Important telehealth topics

1. Optimizing the patient encounter in telehealth
2. Training on how to deliver telehealth
3. Using telehealth to promote health equity and inclusion
4. Privacy/security/data security
5. Learning about IT solutions for telehealth
6. Finding billing and regulatory information
7. Applying billing and regulatory information into practice

Importance of Telehealth Topics

Base = Academic faculty/admins (n=56)
Ranked from highest score (most important) to lowest score (least important)

Interest in Telehealth Resources

6 in 10 Video modules with staged telehealth visits
1/2 Articles in telehealth technology
less than 2 in 5 Telehealth regulatory information

Academic faculty would like more information on:

62% Optimizing the patient encounter in telehealth
58% Training on how to deliver telehealth
53% Using telehealth to promote health equity and inclusion
42% Updates on telehealth
