

UpToDate clinical decision support in the United States

In 2021, clinicians in the U.S. viewed clinical topics in UpToDate over **275 million** times.

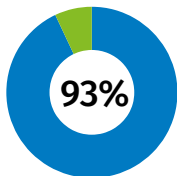

Clinicians overwhelmingly trust UpToDate® to quickly find evidence-based answers they trust at the point of care so they can make the best decisions for their patients.

Trust

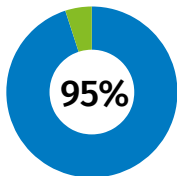

UpToDate is the decision support resource clinicians **trust**.

would recommend UpToDate to colleagues.

trust UpToDate as a point-of-care clinical resource.

believe UpToDate keeps them current.

2021 UpToDate Subscriber Survey: N=25,378

Impact

UpToDate has an **impact** on care.

94% agree UpToDate improves the quality of care provided to patients.

88% agree UpToDate helps prevent errors.

Improved patient safety

UpToDate is the only clinical decision resource proven to be associated with **improved outcomes**.

Over a three-year period, researchers at Harvard associated the use of UpToDate with:

- ✓ **Improved quality of care for many conditions**
- ✓ **Shorter lengths of stay** (372,000 hospital stays saved per year)
- ✓ **Lower mortality rates** (11,500 lives saved)
