How Librarians centralized services, using Ovid® Discovery

**Learn how you can use Ovid Discovery to simplify user access to all the electronic resources at your institution.**

BVCSCM librarians wanted to empower users to be able to find all their public health content and tools in one place.

**The challenge:**
To develop a new library portal which would integrate all resources (like UpToDate®), to satisfy and fulfil the needs and requirements of BVCSCM’s users.

**The solution: A centralized search experience**
Requiring a system where librarians can make updates and corrections quickly, BVCSCM chose Ovid Discovery, primarily for its ease of use, as well as how customizable the landing page is.

Ovid Discovery offers several customization options, functionality and tools, such as precise medical searching through a MeSH-controlled vocabulary thesaurus, a Library Resources A-Z search, and a mobile-friendly interface.

Ovid’s Support team worked closely with the librarians to create a customized configuration of Ovid Discovery that worked best for BVCSCM’s users. For example, the integration of UpToDate results was very well received. Ovid Support continues to add resources, helping the librarians to save time.

“We have significantly improved the image of our library, by centralizing all services, content, and tools”
- BVCSCM librarians

**About BVCSCM**
The Biblioteca Virtual Ciencias de la Salud de Castilla La Mancha (BVCSCM) provides health professionals of the Castilla-La Mancha Health System (SESCAM) with electronic content and tools. SESCAM operates 20 hospitals and provides public health services to 1.8 million citizens in Spain.
