# Speed Saves.

VisualDx® for Emergency Medicine

VisualDx ensures faster, more accurate diagnosis and safer decisions in your emergency department. Simply enter whatever information is available - visual clues, symptoms, patient history - to instantly build an image-based differential. Have confidence in diagnosis, make the right referrals, and admit patients only when necessary. It's the quickest route to better patient care.

The Value of VisualDx for Emergency Medicine:

- Spot a life-threatening or infectious condition early - even if you've never seen it before.
- Deal with challenging cases directly.
- Educate and engage with your patients quickly through images.
- Immediately find the best therapy, management, and treatment.
- Handle complex variations.

- **41,000+ Images** of disease or clinical guidance on therapy, management, pitfalls, and more.

> *I had a young man with a rash I had not seen before and was concerned for it being Fournier's gangrene – although he was not septic appearing and was not a diabetic. I used the algorithm to help me narrow it down and it turned out to be Fournier's – we got it very early and saved his life.*
>
> *He became very sick quickly while still in the ER. VisualDx really helped me narrow it down and helped me decide on a treatment course very early on.*
>
> **R.E., MD, Emergency Medicine**
