# Visible Body® Courseware

Courseware is a web-based teaching and learning platform loaded with *Visible Body's* award-winning content. The platform comes with an extensive visual database of healthcare education content including LMS features. Instructors can use Courseware for reference, to deliver course assignments and assign quizzes, manage grades, transform lecture presentations to include 3D models and animations, and expand and enhance anatomy lab dissections.

Offer students interactive assignments and lessons that engage their passion for anatomy and physiology.

Developed by instructors, for instructors:

- **Browse** premade visual and interactive courses and lessons. Assign them as-is to students or customize for your course.
- **Transform** lecture slides to interactive presentations that use 3D models and brief animations
- **Give** students interactive homework assignments that prepare them for lab
- **Assign** 3D model dissections with student performance reported to a grade book

Visible Body Courseware offers:

- All instructors access to Visible Body's 3D human anatomy models, physiology and pathology animations, hundreds of premade visual and interactive lessons, and a quiz engine that includes thousands of questions, premade-quizzes and multiple tools to create and offer assessments.
- Students get access to course content, the entire visual database to study, and can download Visible Body best-selling mobile apps to their phones or tablets.
