

Legisway Essentials

The easiest way for legal departments to simplify the management of their legal information, control risk, share data, and serve their business.

Does your legal department have control over legal information and risk?

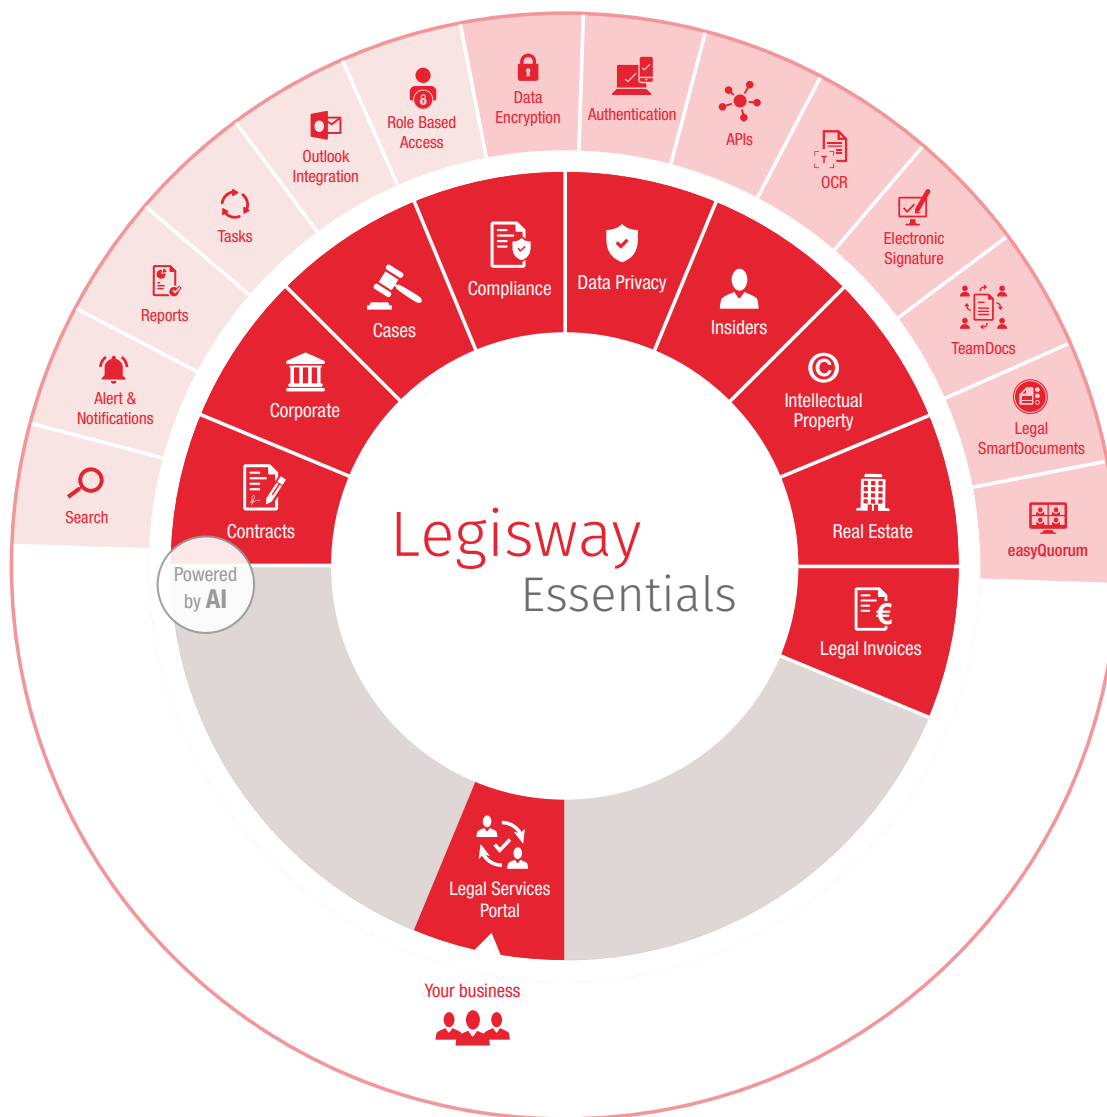

Businesses are asking legal departments to take on more work with limited resources, resulting in information overload. With so much pressure to keep pace, providing stakeholders with accurate answers and mitigating risk is a challenge.

To take back control and provide value, legal departments cannot get by with the ad hoc spreadsheets, shared drives or generic software they are using today. It's time to stop doing things the hard way.

Legal departments need an easy way to control their legal information, extract value, manage risk and share data with other departments
