

OneSumX ESG Disclosures Reporting

Report ESG Pillar 3 Prudential Disclosures with confidence. Navigate evolving ESG Regulatory Reporting requirements with ease and identify opportunities for a more sustainable future.

Following the European Banking Authority's (EBA) publication of its binding technical standards on Pillar 3 disclosures on environmental, social, and governance (ESG) risks, financial institutions now face the challenge of reporting comparable disclosures showing how climate change may exacerbate other risks within their institution's balance sheets, as they adjust their business strategy and pave a sustainable pathway toward the Paris Agreement goals.

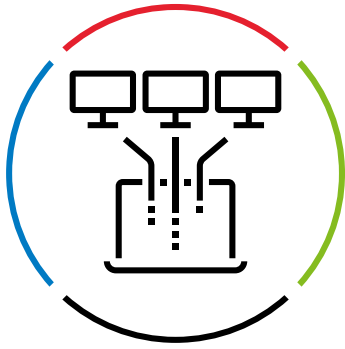

In addition to qualitative disclosures on ESG, financial institutions are also required to provide comparable insight on climate transition and physical risks – with a strong focus on alignment with the Paris Agreement objectives – such as exposures toward carbon intensive sectors and customers, and the calculation of the green asset ratio based on the new EU taxonomy.

OneSumX ESG Disclosures Reporting offers a comprehensive set of comparable disclosures and key performance indicators (KPIs), including the Green Asset Ratio (GAR) and Banking Book Taxonomy Alignment Ratio (BTAR), enabling banks to embed sustainability considerations into their business strategy, models and risk management processes.

OneSumX[®]

wolterskluwer.com

Achieve compliance, increase transparency and report ESG disclosures with confidence.

- Improve accuracy, timeliness, quality, efficiencies, and governance of regulatory reporting processes.
- Create efficiencies and reduce risk with advanced calculation libraries in accordance with regulatory rules.
